# Which dining hall would you prefer?

Shelter from the weather no longer means being shut in. Daylight Walls protect you from cold, wind, rain, without shutting out sunshine and view.

Here's an example, the lovely dining room at Hiram College. Through its big window areas, the rolling hills of nonchastern Chio are an everchangnor mural. Blue spruce and dogwood around the playing field are lovelier than opaque walls could ever be. And because the windows are Themophare's insulating glass, winter landscapes can be enjoyed in comfort without excessive heat loss.

Apply this idea to any building you have in mind — a school, hospital,

office, factory or your home. A Daylight Wall has clear glass from wall to wall and sill to ceiling. It gives you maximum natural daylight and opens up the room to blend the indoors with the outdoors. The room feels larger when glass unites it with the outdoors.

A Daylight Wall of Thermopane insulating glass is economical, too; it is lightweight, quick to erect, needs no interior finishing.

For quick facts on Thermopane, see the box at right. For the latest literature on Daylight Walls and Thermopane, write Libbey Owens · Ford Glass Company, Toledo 3, O.

#### THERMOPANE QUICK FACTS

Thermopane \* insulating glass is widely and successfully used in all types of buildings. Thermopone with 1/2" of dry air hermetically sealed between two panes has twice the insulating value of single glass. It insulates about the same as a 10" solid masonry wall. This minimizes chilliness, drafts and heat loss at windows in winter. Thermopane cuts air conditioning costs by reducing the amount of heat entering during summer. It shuts out 44% more noise than single glass. Write for Thermopane literature, Libbey-Owens-Ford Glass Company, 46122 Nicholas Building. Toledo 3, Ohio,

MECHANICAI MARVEIS are becoming commonplace today ... but here's one you may not have heard about. It's a multiple tie-tamper. Twelve tampers controlled by a single man, automatically compact ballast under ties, producing finished track in one operation, more quickly and more safely. Steel for machines like this is made by United States Steel.

MOUNTAIN OF RON. Discovered in Venezuela by exploring U.S. Steen lineralegists, Cerro Bolivar is literally a whole mountain of iron ore, excellent quality. The discovery and development of this new source of the precious mineral has been part of U.S. Steel's effort to assure a continuing and expanding supply of steel to meet America's needs. The better we produce, the stronger we grow.

# <mark>ca</mark>n do so many jobs so well

is this curved steel barrel deflector for sub-machine guns. The automatic rapid fire weapon fires a 45 cal, bullet, the same as the 45 cal, automatic pistol, and the bullet is deflected in a groove (inset) to a 45 degree angle.

HOW CAN IT BE SO SHARP? Razor blade steel must be clean steel, free from certain impurities, or blade edges will nick when honed. Today, United States Steel produces about three quarters of the special razor blade steel used each year in America.

STAINLESS PREFERRED. A bus manufacturer reports that the bus shown above is made in two models . . . a standard model and a model with side panels of silvery stainless steel. When the stainless bus and the conventional painted panel bus are dispatched for the same destinations at the same time, passengers will usually choose the stainless steel

sided bus in preference to the other. Only steel can do so many jobs so well!

#### **FACTS YOU SHOULD KNOW** ABOUT STEEL

Last year, the iron and steel industry used about 100,200,000 tons of coal. If loaded in 50-ton hopper cars, that amount of coal would fill a train long enough to go more than halfway around the world at the equator

This trade-mark is your guide to quality steel

# **New Greaseless Way To Keep Hair Neat All Day**

"V-7"-new grooming discovery now in Vitalis Hair Tonic - outdates messy oils. Keeps your hair neat all day without gummy film or matted-down look.

#### Not an animal, vegetable or mineral oil

If you object to over-oily hair tonics, as most men do, here's good news. Now you can keep hair in place and easy to manage -yet avoid that gummy, "oil-slick" look. The secret is a completely new kind of

grooming agent - introduced to you in new finer Vitalis Hair Tonic.

Called "V-7." it is not an animal, vegetable or mineral oil. In fact, "V-7" was developed in the laboratory especially to overcome the messiness and other disadvantages of greasy oils.

#### Make this easy test

Even if you are satisfied with your present hair tonic, we think you'll be pleasantly surprised the very first time you use new finer Vitalis containing "V-7."

1. Hair stays neat, natural-looking. No heavy greasy look.

2. No gummy film or "matting down." You can easily prove these facts for yourself. Just apply the tonic you are now using to one side of your head-new finer Vitalis to the other. See if you don't agree that the Vitalis side looks far better.

#### Feels tingling goodrouts flaky dandruff

In addition to good grooming, new Vitalis gives you a combination of active ingredients found in no other leading hair tonic.

Massaged briskly onto scalp in the fa-nous "60-Second Workout," new finer Vitalis feels tingling good . . . far more refreshing than any cream or oil dressing. What's more, Vitalis routs dandruff flakes . . helps you avoid that embarrassing "snow" on your collar.

#### Outgrooms any other hair tonic -or double your money back

We think you'll find new Vitalis with "V-7" the finest hair tonic you ever used. If you don't agree, return empty bottle to Bristol-Myers, 630 5th Ave., New York 20, N. Y. and get double your money back. (Offer expires April 30, 1953.)

Product of Bristol-Myers

regrettable lack of other forms of perspective. These are the armchair variety of philoso pher, politician, diplomat, businessman and economist who can't see past theoretical idealism to the cold, practical facts . . . I venture to guess that most of them are under 35

-William Allen White's arbitrarily set age of them-Hollywoodians-are no doubt maladjusted and feel the need to cling desperate-

to their raised eyebrows. Incidentally, I have a suspicion that a big hunk of the 27 million mentioned in one letter are far from intellectual I must admit that I am an alumnus of the

-I once voted for Norman Thomas. (I was well under 35.)

HARRIET F. BECKUS North Hollywood, Calif.

What manner of being is an egghead? Do you mean a sort of Martini-sipping Guru of beer-guzzling disciples? Or just anyone in whom intellect surpasseth understanding? . . . Perhaps . . . your readers can give us a clarifying definition of this intriguing word coinage . . . So many of Time's readers in your Letters column acknowledge being eggheads, we should certainly be able to pin this thing down

TOM SWEENEY

Wheeling, W.Va.

Perhaps this will help in the egghead discussion: 1) an intellectual is a person who is well-informed and intelligent; 2) a liberal intellectual is an intellectual who espouses liberal political programs; 3) an egghead is a person (possibly intellectual) who for profit, publicity or in the search of power espouses liberal political programs.

Neither the Republicans nor the Demo-

crats, Ike nor Adlai, have to worry about the first two categories. But you and I and everybody have a lot to worry about if the third group gets power

ROBERT S. RADCLIFFE

Ardmore, Pa.

. The term egghead was, if I gather rightly, originally intended to be a bit derogatory, indicating a capacity for and a preoccupation with mental activity of a particular kind, limited in its scope, and by no means resulting in an orderly process of thought capable of producing wise decision, nor of envisaging constructive and adequate planning for this nation's life, liberty and happi-ness. Alger Hiss is an egghead, Whittaker Chambers is an egghead, with a latent streak of common sense. There are all kinds of eggparanoiae, schizophrenic. including a few useful ones.

The electorate, however, was not looking for an egghead . . . At work in its mind was what Barrett Wendell of Harvard described as "the awful sanity of the average man" . . . MARJORIE CATHARINE CAREY

Tulsa Sir:

. As a lifelong Democrat who tried without success to make some sense out of the beautifully phrased, intellectual double-talk of the late lamented "talk sense to the American people" candidate, let me say that I am proud that my one vote helped to swell the total to 33 million for a first-rate President . . . Let the weeping and wailing of the land and praise God that the 33 million who for once used the good old-fashioned horse sense He gave them now have the upper

#### A LETTER FROM THE PUBLISHER

#### Oear Time-Reader

Recently I attended a luncheon meeting of newspaper and magazine publishers in honor of Colonel John Jacob Astor, chairman of the London Times, Colonel Astor had come to ask for help in finding the next of kin of U.S. servicemen killed in Britain, or in operations based on Britain, during World War II. The Times, he explained. wants to give these near relatives a book it has just published, Britain's Homage to 28,000 American Dead.

The book is a warm tribute to U.S. soldiers, sailors and airmen who made Britain their home for a period during the war, as well as a sincere effort to cement good will between the two largest English-speaking nations. That

feeling is best typified in one sentence of a message from Winston Churchill, opposite the fron-tispiece: "To those who did not return the best memorial is the fellowship of our two countries, which by their valour they created and by their sacrifice they have preserved.

The book's first chapter is a candid account of the relationships. frictions and ultimate understanding between the people of Britain and the hundreds of thousands of U.S. servicemen whom they sudden-

ly found in their midst. Later chapters tell of the financing of an American Memorial Chapel in St. Paul's Cathedral (through the small, anonymous contributions of millions of people in the British Isles, who raised approximately \$280,000), and of the dedication on July 4, 1951 of the Roll of Honour, listing the names of the 28,000 American dead.

The story of the chapel is told in the book's preface: "In the eastern anse of the war-scarred St. Paul's Cathedral, in the heart of the City of London, stood the Jesus Chapel, which was wrecked in the blitz of 1941. Where the Jesus Chapel once stood, a new shrine is now taking shape . . The American Memorial Chapel in St. Paul's . . . commemorates the Americans of all services who lost their lives while based upon Britain during

TIME's European advertising manager, Walter Graebner, had written me earlier about the book. He called the opening chapter "a frank, amusing, and deeply moving story," which "probably tells more about what the British really thought of the American soldiers and what the Americans thought of the British than anything published so far.

The book tells how Britons gradually came to know the U.S. serviceman, and to discover the "likeness between G.I. Joe and Tommy Atkins

. . Like his British colleague, the American soldier was an amateur, and reared to mistrust the posturings of professional militarists . . . A civilian at heart, he drove his tank as if it were a long-distance truck on U.S. Route 1, set out from British ports on Arctic convoys or anti-submarine patrols as if he were taking the family across to Staten Island, and bombed-

up a Flying Fortress as though he were loading the mails from Bismarck for Butte. Montana.'

When the British press and radio sent out requests for donations to build the chapel, thousands of letters accompanied the gifts, many telling of the writers' recollections of men in the U.S. forces.

"In those years." book the "death became all men's familiar, but to the British the losses among American forces stationed in their own island seemed especially poignant, for these

men and women were their peculiar charge . . . The comradeship of war may fade . . . and bickering, jealousy and suspicion may again become the common currency of international relations. But individuals have longer memories than nations."

The Times tried to get the names of next of kin, but learned that no such list exists, since the Defense Department has no breakdown of war dead by battle areas. Those eligible to receive the book have been asked to send a card to Colonel J. J. Astor, the London Times, 45 E. 51st St., New York 22, N.Y., and to give their name, address, relationship to the serviceman, his name and his military unit. If you are among those who receive a copy of Britain's Homage, I know it will move you as much as it did me.

Cordially yours,

James a. L.

# From the beginning Borg-Warner has worked hand in hand with FERGUSON

# To fit the special needs of Ferguson, Borg-Warner produces many essential operating parts.

Important companies in every industry long have been served by Borg-Warner. One of these is Harry Ferguson, Inc., maker of farm equipment. This well-known company has done much to bring greater labor saving and efficiency to farming with its special system of implement

linkage and control.

Actually, all the leading builders of farm equipment use a wide variety of precision B-W parts.

These parts include harrow and plow discs, harrow teeth, hydraulic control pumps, chain drives, universal joints, transmissions, clutches, carburetors, and soft-center and special tillage steels.

Whatever is needed, broad skills and large-scale facilities enable Borg-Warner to "design it better—make it better". Thus each day, Borg-Warner helps America eat better, live better.

A Feeling for the Situation

"Now I have a feeling for this situation," and President-elect Dwight Eisenhower as he was leaving Korea last week, He had flown : no,3¢ miles to Socul, spent the world's most practiced inspecting eye, the world's most practiced inspecting eye, He talked face to face, piling question on question, with the top U.S. Army, Navy and Air Force commanders in the Pacific, with Korea's doughtly President Rhee, with front-line officers and G.Ls. Then he went into retreat with his staff on the U.S.S. Helman in mild-Pacific to translate a feel-

ing for the situation into a course of action. While the Helena steamed toward Pearl Harbor, the U.S. began to sense the real effects of Eisenhower's trip. By plane he dispatched his new Defense Secretary Charles Wilson and J.C.S. Chairman Omar Bradley to Pearl Harbor to preside over a series of conferences on the military aspects of the situation. By plane and helicopter he brought his new Secretary of State John Foster Dulles and his close White House advisers to join him aboard the cruiser for high-policy discussions. By the time the two task forces joined in Hawaii, they would be able to match and mesh their potentialities and plans. Somewhere after that, the President-elect of the U.S. would make his decisions.

The whole process was no surprise to those who knew lies methods in Europe. It was a surprise only to those at home who, since the end of World War II. never have seen the U.S. tackle its basic probable with the process of the world of the world with the world of t

### THE PRESIDENT-ELECT

In the stariit stillness of 5:30 a.m., a lonely New York policeman stamped his feet and tried to beat off the chill as he stood watch outside Ike Eisenhower's upper Manhattan residence at 60 Morningside Drive. A black Cadillac limousine rolled through the empty streets and pulled up at the curb. Two U.S. Secret

Service men got out. One walked up to the cop. chatted with him and drew him away from the door. The other slipped inside. A moment later, with the cop's back turned, a quick stidling man, with his felt hat drawn low and the collar of his camel's-hair cost turned up, hurried out

EISENHOWER IN KOREA

Question on question, face to face.

of the house and into the limousine. Then the two agents hopped in, and the Cadillac pulled away into the night.

Ike Eisenhower was on his way to Korea, muffled in the most elaborate cloak of security the U.S. Secret Service could stitch together. As his car rolled toward Mitchel Air Force Base, the rest of his party materialized from their quiet "fadeaways" from everyday life. The three reporters assigned to the trip met at Manhattan's Pennsylvania Station, then headed out for Long Island with the Secret Service in charge. Ike's Defense Secretary Charles E. Wilson strolled slowly out of the Waldorf-Astoria without any luggage, took a cab to the southeast corner of 58th Street and Fifth Avenue. He waited only a moment before a sedan picked him up and whisked him toward Mitchel Field. There crewmen worked rapidly around two Constellations.

One by one, Ike's guests and staff tramped aboard his plane. There was his old friend and West Point elsemate, General Gener Bealdy, chairman of the Old Chiefs of Staff; Rich and Chief of the White Major General Wilton B, Person nell. Major General Wilton E, Van Wilson M, Person Nell M

Who's Their Guy? From New York the two Consellations hopped nonstop to San Francisco, then to Honolulu, then to Midway Island. They traveled under false identification and flight numbers for miles from a slip or another than roo miles from a slip or another than roo miles from a slip or another than roo miles from a slip or another than the slip of the

When the press contingent caught up with Ike in the morning, photographers begged him to repeat his trip to Suribachi. He agreed. On the way out, the official party transferred from a Chevrolet sedan to a jeep for the last steep part of the climb. Said Charlie Wilson, soon to resign as president of General Motors: "Why are we changing to the jeep?" Replied the driver: "That hill's too steep for the Chevrolet to make it." "Are you sure?" pressed Wilson. "I'm damned sure, sir." said the driver. When Wilson was gone. the G.I. snorted: "Who's that guy? "Why," said Herb Brownell with delight. "he's the man who makes Chevrolets. The driver swallowed. "Oh. lordy, I put my foot in my mouth, didn't I?"

Bross in the Loundry, Just after 8 p.m. on Tuesday, the two Constillations put down on an icy runway at a little-used field outside Seoul. Only a briff colonel was on hand for the reception: G-2 had learned that 132 Communist agents had recently slipped into Seoul. feared that a reception by high brass might be a tipoff to like arrival. He, bundled in an overelled quietly inseedin and the convoy colled quietly inseedin and the convoy colled quietly his car pulled up at Eighth Army bead-quarters. U.N. Commander Mark Clark and the Eighth Army's James Van Fleet

stepped out of the shadows for a handshake and an old friends' greeting. Then they hustled Ike inside for a turkey sandwich, a cup of hot chocolate and a bull

That night Omar Bradley slept in Van Fleet's room, which faced on the street. Ike—on the insistence of the Secret Service—slept in a room off the street and facing the compound. And four-starred Jim Van Fleet, outranked all around, moved to an Army cot in the laundry.

They awoke to a clear, bitter-cold Wednesday. Ike put on his old battle jacketwith no rank insigne, but still sporting the flaming-sword shoulder patch of SHAPE -and wool Army trousers, then added a fur-lined Army field parka and a pile hat. First, he flew off in a little L-10 Cessna for a look at the 4th Fighter Interceptor Wing (where he asked about the capabilities of MIGs), then on to a briefing at the 1st Marine Division's command post, six miles from the front and well within ground-shaking distance of Marine artillery and aerial rocket fire. In the afternoon he arrived at I Corps headquarters. put on his gold braid NATO overseas cap to take a salute from the shivering troops of 15 U.N. nations, Finally that night Ike got a little time alone with his son, Major John Eisenhower of the 3rd Infantry Division, who was detached from his unit to serve as Ike's aide during the Korean trip. Grandfather Eisenhower passed along the latest reports on John's three youngsters, and confided that he had bought John's wife a fur coat for Christmas.

Many Ikes. The next two days-Thursday and Friday-were packed tight with briefings and conferences. Ike the strategist got up for an 8 a.m. talk with Major General William Chase, the U.S. military adviser to the Chinese Nationalists on Formosa. Said Chase later: "I frankly think he learned more about the situation in Formosa than he'd heard before." Ike the world-soldier stopped by to see an old friend, Britain's Major General M. M. Alston-Roberts-West (said West later: "He knew as much about my division and what it has on the line as I did myself"). Ike the President-elect told South Korea's General Chung Il Kwon: "As far as I'm concerned, you ROKs are going to be a lot higger & better." Ike the general visited an Army mobile hospital and chatted briefly with the natients.

It was Ike the old soldier who hunted up his old outfit, the 15th Infantry, in which he served as a lieutenant colonel at Fort Lewis, Wash, more than twelve years ago. He stood in the chow line of B Company, 1st Battalion, then sat down on an old ammunition box with three G.I.s to eat pork chops and sauerkraut off a plastic plate. They chatted about the news-lke freely, the enlisted men with awe at their guest-and Ike made a surprising confession: "I don't read the papers," he said. "I wait until they come out and tell me-If it is bad enough, I'll hear of it." When a messenger came down to invite Ike to join the other generals in a tent, he said: "You

mean all the brass is in there? O.K., but is

it all right if I bring my friends along?"
It was and he did.

Ike the diplomat caught one last hot potato. During his visit, he met three times with South Korea's President Syngman Rhee (and publicly said that Rhee "shows every qualification of a great leader"). But on Ike's last crowded afternoon, Rhee's agents buzzed around headquarters insisting that Rhee would lose face if Ike did not pay a return call on the presidential mansion. The Secret Service was against going about in Seoul, but finally Ike gave in, and changed his schedule. Back in his rooms within an hour, he packed up, left a \$20 tip for Suzy, Van Fleet's Korean maid (who said later that she still thinks Cardinal Spellman the nicest American), and said goodbye all around. At 8:01 p.m., just three days after his arrival, Ike's planes took off for Guam.

Douglas MacARTHUR
Waiting to be asked.

An hour later, the Army released the story of his trip. "No Panaceas." What did Ike get out

of his trip to Korea? He tried to give an off-the-cuff summary to 125 correspondents who crowded into the Eighth Army's war room for a press conference on his last day. Said he: "We have no panaceas, How difficult it seems to be in a war of this kind to work out a plan that would bring a positive and definite victory without possibly running the grave risk of enlarging the war. There are many limitations in a war of this kind, but this much is certain: here we are realizing that freedom is an indivisible thing . . . We are all here to see it through. Much can be done, in my opinion, to improve our position. Much will be done.'

Some correspondents were miffed because Eisenhower allowed no questions; many tried hard to read hard promises and plans into his statement (e.g., Ike will not extend the war to China), but the readings were premature because Ike himself had not had time to digest the enormous mass of facts accumulated on his trip. The only substantial gleaning was the news that in Korea the commanders had urged him to.

If Reinforce the ROKs and send more

¶ Attack the Communists by land and sea. ¶ Keep U.S. forces in the front line until the Reds have been pushed farther back. ¶ Only then consider U.S. troop withdrawals.

Ike kept his feelings to himself as he flew toward Guam, At Guam, he. Wilson, Brownell and the correspondents left the planes and boarded the Navy's U.S.S. Helena, a heavy cruiser, for the trip back to Pearl Harbor. The Helena's wireless crackled, and when the cruiser hove to off Wake Island, a helicopter brought aboard Ike's Secretary of State John Foster Dulles Treasury Secretary George Humphrey, Interior Secretary Douglas McKay, General Lucius Clay, Budget Man Joe Dodge, Emmet Hughes, campaign speechwriter who is to be on Eisenhower's White House staff, and C. D. Jackson, boss of the Ike speechwriting team during the cam-paign. Meanwhile. Wilson flew off to join Bradley at the military conference at Pearl Harbor.

Ike expected to stop over briefly at Pacific Fleet headquarters at Pearl Harbor, then fly on home to close the circle of a 22,000-mile journey without precedent in U.S. history.

#### OPINION

Clear Solution

To a onetime subordinate with whom he has long been on bad terms. General of the Army Douglas MacArthur last week extended a small olive branch. Before a meeting of the National Association of Manufacturers (see Business & FINANCE), MacArthur, now chairman of the board of Remington Rand, urged "firm support of the new Administration, and expressed the hope that "our respected President-elect" might safely and successfully accomplish "his self-appointed task" in Korea. The onetime U.N. commander also indicated that he might be able to give Ike a hand. Said he: "While it is well known that my own views have not been sought in any way, yet I am confident there is a clear and definite solution to the Korean conflict.

solution (6) the Korean collision.

solution (6) the Korean collision.

thing of his firing by Harry Trumun (attack on Manchuria, blockade of China, use of Chinese Nationalist tropps) is no longer "entirely applicable." MacArhur deciared, just what his plan is, however, "A present solution involves basic decisions which I recognize as improper for public disclosure or discussion, but which in my opinion can be executed without either an unduly heavy price in friends with the provoking universal conflict." danger of provoking universal conflict."

#### REPUBLICANS

#### The Durkin Tempest

As one appointment after another flashed out of Dwight Eisenhower's New York headquarters, there was scarcely a sound from Ohio, where Robert A. Taft was sitting out the interregnum. After the last Cabinet post was filled. Senator Taft had something to say. Having slept soundly on his indignation, he wrote out next morning a statement denouncing the appointment of the A.F.L. Plumbers & Pipe Fitters' President Martin P. Durkin as Secretary of Labor. It was "incredible," said Taft, that the President-elect should appoint a man who "has always been a partisan Truman Democrat, who fought General Eisenhower's election and advocated repeal of the Taft-Hartley law."

More then Durkin. There was more than objection to Durkin behind the statement. Bob Taft was milfied because I's so many "Dewey Republicans" had advised like on appointments. 21 so many Taft Cabiner tecommendations had been rejected and 3) the selection of his fellow of the Treasury had not been checked with him. When Taft's words hit the press wires, political reporters leaped to conclusions: the big battle in the Republican Taff might lead a fight against confirmation of Durkin. This view Dower welded by a President newly

elected by a big majority. Taft understood this power better than most reporters did. Characteristically, he had bluntly said what he thought, but he showed no sign of wanting to start an all-out feud. No one at the Eisenhower headquarters was inclined to get into an argument with him, Contrary to some speculation, there was no oversight and no deliberate affront in the way the Durkin appointment was handled. Taft was asked for recommendations. submitted some (including Connecticut's former Senator John A. Danaher). His suggestions were considered, and rejected, Ike thought that Durkin would give the Cabinet balance and implement the campaign promise that his administration would be "fair" to labor. The appointment was a characteristic Eisenhower effort to unify all the forces in his theater of operation. At the same time, it was a further demon-

Swing to Bridges. In Washington, hardly anyone thought that Taft would oppose confirmation of Durkin, and no one thought that the Senate would refuse to confirm him.\* The Ohio Senator's colleagues in Congress failed to provide any choral background for his solo. Vermont's Senator George D. Aiken, who will rank

stration that Ikemen felt no need to clear

☼ In all U.S. history, only seven Cabinet nominees have been rejected by the Senate. The last one: Charles B. Warren, Michigan "sugar trust" lawyer nominated for Attorney General by Cally Coolidge in 1975. He was turned down by a Go.P. Senate which feared he would not enforce antitrust law faith.

ROBERT A. TAFT

next to Chairman Taft on the Labor Committee, thought it was "wise to recognize organized labor in the Cabinet." Several Taft-minded Senators, e.g., Kanasa' Andrew Schoeppel, swung behind New Hampshire's Styles Bridges, rather than Taft, for Majority Leader.

At week's end. Bridges was the leading prospect for the post. The C.O.P. Senators don't want an intra-party fight, and many of them fear that Taift, as Majority Leader, might keep one brewing. Said one Senator: "If Senator Taif wants to squabble with General Eisenhower that is his business, but the party can't afford to have him do that as Senate Majority Leader."

JOSEPH D. NUNAN JR.

#### THE ADMINISTRATION Chain of Command

"He's my kind of guy—we need more men like Nunan." remarked the late Robert Hannegan of St. Louis. onetime (1943-44) Commissioner of Internal Revenue. Soon after, when Hannegan became Democratic Party Chairman, he picked Joseph

D. Nunan Jr. to succeed him.
As B1R commissioner (1944-47), Nunan found need for his own cronies in top jobs.
For Brooklyn collector he chose Joseph P. Marcelle, a Brooklyn ward boss, For director of New York's alcohol tax unit:

James B. E. Olson, his former deputy, When Republican Senator John J. Williams touched off the scandisk in the BIR, Marcelle and Olson were among the first casualities, Daniel A. Bolich, one of Numan's top tax agents in New York, who later became Assistant Internal Revenue was indicted for evading Revenue was indicated for evading Revenue and Company of the Co

Last week, after months of investigation, the same federal grand jury in Brooklyn that indicted Bolich charged Nunan with tax fraud and evasion. The indictment said that over a five-year period Nunan had cheated Uncle Sam out of So<sub>1.0</sub>86.

#### THE PRESIDENCY

Spectacular Ruins

The day after Thanksqiving, a relaxed John L. Lewis trundled abord on occan liner and headed for South America. This was a clear indication that Lewis was certain of something that most other people could only suspect: that Harry Truman had already agreed to overrule his mobilitier, his stabilizer and his Wage Stabilization Board and to grant Lewis United Mine Workers a \$1.90-a-4.00 yay arisise.

and the coal-mine operators have a spread on the increase last September, but the Government's stabilizers chopped it down to \$1.50 a day as an anti-inflation measure. The miners struck. With the election coming on, Harry Turnan called election coming on, Harry Turnan called the coal-miner of the coal-miner of the case would be "reviewed." The miners went back to work, and John Lewis went back to supporting the Demoratic ticket. From that day on, the only real question was what Harry Truman Just for Rie, Last; week Triming have the coal-miner of the coal-miner of

Just for Ike, Last week Truman announced his decision with an explanation that out-Trumaned Truman. If he didn't grant the \$1.90. he said, there would probably be a coal strike for Dwight Eisenhower to deal with right after the inauguration. Said Truman: "I am not willing to take an action that will create such a crisis for my successor."

Along the way, he made another startling statement. He said he had "a firm intention to continue a strong stabilization program and turn it over to the new Ad-

everything with Bob.

ministration as a functioning, effective entity." All he really had left to turn over was a spectacular set of ruins.

The Truman stabilization program from its inception was never actually an "effective entity." Direct controls were never able to counterbalance the Administration's own inflationary policies, and the controls themselves were weakened by political compromise. The Administration and Congress refused to establish effective control of farm prices. Progressive holes were punched in credit controls. There was never effective control of wages, a situation sharply illustrated when the Administration leaped through hoops to give the steelworkers exactly what they wanted last spring. Another illustration: the new increase to the 375,000 soft-coal miners. making their base pay \$18.25 a day, gives them increases totaling \$3,50 a day in less than two years under "stabiliza-

"Shom & Mockery." After Truman made his coal announcement, his WSB chairman resigned, the fourth man to leave that post within two years. Then five board members and two alternates, all industry representatives, quit.

In their resignation statement, the seven WSB men-all Truman appointees-said that "the wage stabilization program is now nothing but a sham and a mockery." They went on: "The consumers of this nation . . . will be called upon to pay for this special privilege to the coal miners . . . This action will result in wage increases so widespread and so large that millions of dollars will be dumped into the consumers' purchasing pool with resultant upward pressure upon all prices . . . It is impossible to turn over an 'effective' program after it has been emasculated . . . What is being turned over to the new Administration is nothing but a ghost of what might have been . . . We cannot escape the conclusion that political expediency was a factor in this action."

#### INVESTIGATIONS

#### Runaway Jury

The federal grand jury for southern New York kicked over its traces last week, running away from the Truman Administration over the problem of American subversives in the U.N. In the past nine months, a hundred witnesses appeared before the jurors; they left behind a shocking impression of Red infiltration at the U.N.'s high levels. But Washington, tried to silicate and State Departments, tried to silicate and state Departments. The properties of the properties of the protein and the properties of the protein state of the properties of the properties of the protein state of the properties of the protein state of the protein state of the properties of the protein state of the protein

<sup>9</sup> "Startling evidence has disclosed infiltration into the United Nations of an overwhelming large group of disloyal U.S. citizens." Many are Communists or pro-Communists; scores among them have long records of former federal employment; most hold positions of trust and responsibility in the U.N. ¶ "The employment of so many of our disloyal nationals . . constitutes a menace to our Government." As host country, the U.S. is at a disadvantage in keeping its subversives out of the U.N.; in contrast, Russia needs merely to withhold passports from those citizens it doesn't want employed by the U.S.

by The U.S. Government has failed to scotch the menace. "In some of the most lagrant and obvious cases of discoyalty, the State Department gave the disloyal officials a clean bill of health to the United Nations." Furthermore. State refused to give the names of State officers who approved such bills of health.

Correctives. The presentment praised the advice given to the U.N. by an international panel of jurists, i.e., discharge of disloyal American personnel (TIME, Dec.

FRANK COE Sixty-five times no.

8), but insisted that the U.S. must take steps on its own. Recommendations: ¶ U.S. security clearance of all U.S. citizens as a condition of U.N. employment. ¶ Plain answers by any U.S. applicant for a U.N. job to plain questions concerning Community affiliations.

Another grand jury to continue the inquiry.

In Washington, the House Judiciary Subcommittee, chaired by Kentucky's Frank L. Chelf, promptly began looking into the charges of interference by the Justice and State Departments.

Dismissols. The grand jurors reported that more than a score of U.N. witnesses before them had refused to answer questions about Communist activity, including espionage; all had taken refuge in the U.S. Constitution's Fifth Amendment, which says that no person shall be compelled to be a witness against himself.

This safeguard in the Bill of Rights is the so-called privilege against self-incrimination; historically, it arose out of the English law as protection for accused individuals who once could be tortured into admissions against themselves. But the right of anyone to refuse to say whether he is, or was, a Communist or a Soviet spy does not carry with it the right to a job in the U.N, or anywhere else.

Justice Oliver Wendell Holmes, in a famous opinion of 1892, made this important point. The case concerned a New Bedford, Mass, policeman, fired from his job by the mayor because he solicited local rule. The policeman claimed that he had been denied his constitutional right to express his political polinions. Ruled Justice Holmes: "There is nothing in the Constitution... to prevent the city from making it part ... to prevent the city from making it part of the good conduct required. The petitioner may have a constitutional right to talk politics, but he has

no constitutional right to be a policeman,"
U.N. Secretary General Trygve Lie
seemed last week to be veering toward a
similar decision. On the beels of the grand
jury's presentment. he sent an ultimatum
to nine U.N. officers who had recently
refused to answer questions before the
Senate Internal Security Subcommittee
about possible Communist affiliation.
Warned Lie: "subcommittee about possible to the subcommittee of the s

#### Man of Bretton Woods

Elizabeth Bentley, testifying before the Un-American Activities Committee in 1948, brought up the name of Virginius Frank Coe. She remembered him vaguely as an important Treasury official, one of the underground Communists in the Federal Government who passed on information to the Soviet spy ring for which she had worked. Indignantly and categorically, before the same committee. Coe denounced the Bentley testimony as "entirely false." He swore that he was never a Communist, never followed the Red line, never knowingly gave official data to Soviet agents. How wicked it was, he went on, for innocents like himself to be slandered by the likes of Elizabeth Bentley; he demanded (but was not allowed) to cross-examine his accuser.

On a Davenport. At the time, Coe looked invulnerable. His Washington career had been highly successful. A native of Richmond, a graduate of the University of Chicago, Coe had worked at Johns Hopkins and Toronto Universities and for the Brookings Institute before he came to Washington in 1934 at the age of 27.

His first bureaucratic post was Treasury consultant. Later, he served with the Federal Security Agency. Board of Economic Warfare, Foreign Economic Administration, Joint War Production Committee of the U.S. and Canada. He held responsible jobs in those agencies, and he was in a position to influence important U.S. wartime and postwar decisions.

As monetary research director of the Treasury Department, he worked closely under Assistant Secretary Harry Dexter

White, who died soon after Whittaker Chambers called him a key figure in the Red infiltration of Washington. To many of his subordinates. White seemed a rather frightening and unapproachable boss. Coe, who used to stretch out on the davenport in White's office, became a channel between White and the staff. At the Bretton Woods Conference, Coe did important organizational chores, just as Alger Hiss had done during the founding of the United Nations at San Francisco, In 1046. Coe became secretary of the Bretton Woods offspring, the International Monetary Fund, which uses a kitty of \$8 billion to keep a balance in international payments. That job, giving its holder access to sensitive information, ultimately paid him \$15,500 a year, tax-free,

On o Familior Ground, Last weel Bureauerat Coe was summoned to an open hearing of a Senate Internal Security submorning to the property leating the same had popped up in subversion his name had popped up in subversion the Institute of Pacific Relations, he had been linked repeatedly with pro-Communists. Last year the State Department refused him a passport. Just before Ellection Day, Senator Joe McCarthy publicly denounced him, and Treasury Secretain in his diministal from the I.M.F.

This time Coe, his old air of selfrighteousness completely muffled, made no indignant, categoric denials of Communist membership or espionage, Instead, 65 times, in a flat singsong, he refused to answer committee questions, on the now familiar ground that he might incriminate himself. He refused, for instance, to say whether he had ever known White or Lauchlin Currie. He even refused to say whether he was then & there engaged in espionage against the U.S. Cried the hearing's exasperated chairman, Senator Herbert O'Conor: "The sorriest spectacle . . . Very disgraceful . . . Coe should be dismissed summarily from his post."

Two days later, the I.M.F.'s Swedish director, Ivar Rooth, tersely announced that Virginius Frank Coe had resigned his job—by request.

#### LABOR New Boss of the C.I.O.

The C.I.O. last week ended the bitter, public struggle for power touched off by the death of Philip Murray early in Nowember. Unable to reach a behind-the-scenes agreement on Murray's successor, to punion leaders threw the fight on to the floor of the 14th C.I.O. convention. There, in a roll-call vote, the C.I.O. convention. There, in a roll-call vote, the C.I.O. cleated its Reuther, since 1946 president of the United Auto Workers.

The United Steelworkers' Union, second in size only to the U.A.W. among C.I.O. member unions, fought Reuther's election implacably, and the steelworkers' candidate. C.I.O. Vice President Allan S. Haywood, was backed by more unions than Reuther. Among Haywood's support-

Second Generation. At 45. Reuther (rhymes with Luther) is the best known and most resourceful leader in the C.I.O. His ability is not questioned, but many labor (and industry) leaders deplore his tendency toward labor statesmanship, a phrase sometimes used in labor circles with a heavy charge of sarcasm. Though

tradition of "pure & simple" trades

At 15, Reuther went to work as an apprentice tool & dienalzer in Wheeling, W. Va., his home town. Fired by the apprentice tool of dienalzer in Month of the American State of th

Bare Knuckles. Returning to Detroit in 1935, Reuther plunged into union work, and organized a U.A.W. local whose mem-

he can be intensely practical when necessary, Reuther is an inveterate shaper of far-reaching. "Reuther plans," which to most labor leaders seem to deal with matters outside labor's province. His test with matters outside labor's province, His test symphose of the broad social and economic questions, e.g., the 1945 negotiations between the U.A.W. and General Motors, during which Reuther based his argument not on the needs of the workers he represented. Dut on the assertion that the possess of the common meeded higher possess of U.S. economy needed higher

Reuther is a second-generation labor man, the son of a United Brewery Work-ers organizer. His father, German-born Valentine Reuther, imbued Walter and his three brothers with the class-conscious doctrines of German Social Democracy. As late as the mid-thirries. Walter Reuther was still a professed Socialist. His "Reuther plan" may spring from an old Socialist is contempt for the American

bership grew from 78 to 30,000 in one year. Leader of Detroits first big siddown strike at the Kelsey-Hayes Wheel Plant, he also played a major role in the U.A.W.'s Communists. He won his first major beat the with the Communist. He won his first major batte with the Communist. He won his first major batte with the Communists had supported. He cinchect was well from R. J. Thomas, whom the Communists had supported. He cinchect the victory in November 1047, when he finally won control of the U.A.W.'s executive board.

During those bloody, brawing years, Reuther collected two bad beatings and a crippled right arm, the result of an attempted assassination by shotgun. He also developed his talent for bare-knowled politics, a shrewd publicity sense, and a regulation for brash, effective repartee. (Two weeks ago, when President-elect Two weeks ago, when President-elect as a boy he had put in many a twelve-hour workday, Reuther was ready with a ouick

CAPTAIN BLANCHARD
He said Merry Christmas.

comeback. "General," said he, "you should have joined the union.")

Reuther's obvious urge to power and his lack of personal warmth sometimes worry his admirers, one of whom has remarked nervously on the U.A.W. president's resemblance to the stereotype titan of industry. Like many a business tycoon, he displays a single-minded devotion to work, which often keeps him away from his wife and two daughters for days at a time. No sooner had he won full dominance over the U.A.W. in 1947, than the nonsmoking, nondrinking Reuther spelled out the new order to his associates. "Now." said he, "there'll be no more allnight card games after executive board sessions.

Last week there were predictions that Reuther would never achieve the unchallenged authority over the C.I.O. possessed by his two predecessors, John L. Lewis and Phil Murray, If these predictions proved true, it would not be for want of effort, audacity or determination on the part of Walter Reuther.

#### NEW YORK

The Payoff Port

The Port of New York is a majestic natural harbor endowed with deep rivers, estuaries and bays and rimmed by 700 miles of profituble piers and docks. Thirteen years ago New York handled 25% of all the tonnage shipped to 6 k from the U.S. Today tonnage has slumped to 15% where a payoff is as exaul as a Christmas card, where whole trackloads of merchannale an arrest, and where mobiletes recruit musclemen who are still serving time in Sing Sing.

Last week a five-man State Crime Commission opened public hearings in Manhattan on the plight of the waterfront. To lay a basis, the commission first cast its subpoena net into a school of neatly groomed waterfront businessmen-heads of stevedoring and shipping companies. In theory, these were the helpless victims in the domain of President Joe Ryan of the A.F.L.'s International Longshoremen's Association. In fact and testimony, most of the witnesses turned out to be men who would dangle a dollar on the end of a hook for either bait or payoff, whichever was in order. The basis they laid: racketeering runs rampant on the waterfront because nearly everyone there complacently accepts corruption as a matter of course.

Gratuities & Goodwill, Take the matter referred to as "gratuities." The largest stevedoring firm in the U.S. is the Jarka Corp., which unloads some 4,000 ships a year, did \$40 million worth of business on the Atlantic Coast and the Great Lakes between 1947 and 1952. Jarka's president, Frank W. Nolan, admitted that Jarka paid out nearly half a million dollars in petty-cash "gratuities" in the last five years, Committee Counsel Theodore Kiendl prodded Nolan into an admission: Jarka paid off not only labor racketeers but agents and executives of shipping companies to get their unloading business. E.g., a vice president of the Waterman Steamship Lines got \$2,500 a year for three years, the local manager of the Holland-America Line got \$15,000 a year

for two years.

Not all stevedore company executives admitted to such lavishness with customers and racketeers. But most admitted paying heavy tolls to the International Longshoremen's Union as regularly as they would drop nickels into a parking meter. Jarka paid out some \$58,000 to I.L.A. officials, with a regular \$100 Christnas envelope for Joe Ryan, the boss of I.L.A. Jules Sottnek & Son, stevedores, paid I.L.A. bosses \$14.402 in five years. A Sottnek vice president staked Mike Clemente, an I.L.A. straw boss and graduate of the Socks Lanza mob. to an SILOOO wedding for his daughter. President James C. Kennedy of the stevedoring firm of Daniels & Kennedy, Inc. personally dropped off a sealed envelope, containing \$1,500 in cash, every year at Joe Ryan's office. All burly Joe said was 'hello." and "thanks.

"lan' it a fact." asked Countel Kiendl,
"hat you paid these moneys for the purpose of avoiding the possibility of,
"that strikes." Replieds, you fail to the purpose of avoiding the possibility of, any
strikes. The that is what it done, but I
didn't actually pay to prevent strikes."
Kiendl. "Your motive was to pay the
money and hope that it would keep you
out of trouble?" Kennedv. "Yes, sit."

out of trouble?" Kennedy: "Yes, sir."
Hiring Bosses, The stevedore companies also paid to get on good terms with the hiring bosses on the piers. The hiring bosses on the piers. The hiring bosses runs a dockside institution known as the "shape-up," a ragged morning muster of all the local union longshoremen who want to work. Since there are usually

more men than jobs, the boss's power is absolute: he can demand kickbacks, hire dashoulter he can demand kickbacks, the first at will, dispense LLA, union cards at cut-rate initiation fees, and threaten any stevedoring company with a quick strike. Under the union contract, the hir-ting boss is a foreman appointed by the companies themselves. But he is actually the fire & unhampered agent of the local LLA. care.

I.I.A. cart.

In 1950 Jarka Corp, wanted to work a new pier. The word was passed for Jarka to hire a pier boss named Tony Anastasio, brother of Murder, Inc.; lord high excuiner, Albert Anastasia, When Jarka refused to stand for the shakedown, Anastasio's other piers went on strike, Jarka complained to Joe Ryan, and Joe blandly "recommended" Anastasio, Anastasio was

But this sort of thing was not entirely distanteful to some firms. Jarka Vice President Captain Douglas Vates put it succinctly when he explained why he hired one Albert Ackalitis, a mobster with a police record as long as a towline. "The guiding thought in hiring Ackalitis," said Captain Yates, "frankly, was to have on that pier some order and discipline, as I

call it, amongst the men."

Orderly Rocketeering, Such order is inevitably made for disciplined racketeering inevitably made for disciplined racketeering free field that the Grace Line paid off Timmy O'Mara. a Sing Sing alumnus (burglary) and boss loader on the North River. by carryine, him on the payroll under a phony but he petted Sat, 120 in five years. Joe said "thanks."

than try to cope with organized pilferage. Asked Counsel Kiendl: "Were there ten tons of steel stolen from that pier?" Replied Devlin: "That was the most remarkable case of pilferage."

The Exception. In its first week of public hearings, the Crime Commission got a good look at four live I.L.A. operators. Big Frank Russo, a pier boss, admitted that he had received \$1,400-plus an unspecified amount of "vacation money." Sullen, hulking Fred Marino testified that he was elected shop steward of local 327, denied earlier testimony that he had demanded that the Luckenbach Lines bar all cops and FBI agents from his pier. Anthony Delmar, Brooklyn pier boss, was sworn in while holding up his left hand. contributed little that was either sinister or helpful. Jerry Anastasio, one of the notorious brothers, spent 14 minutes on the stand. He sucked his tongue, picked his nose, blew into his hands, spat into his handkerchief and belched-but the

only words he would utter were his name. By week's end, the committee got a refreshing look at a hearty, roaring exseafarer, Phineas Blanchard, 74, president of the Turner & Blanchard, Inc. stevedoring company. Boomed Old Seaman Blanchard: when Jerry Anastasio and Russo asked to be put on his payroll in 1951, "I came damn near throwing them out. My company has never put anybody -any I.L.A. representatives-on the payroll." How about gifts to shipping lines? In 38 years, snorted Phineas, his Christmas remembrances have consisted of a form letter sending his customers "every good wish for Christmas and the coming year." But even Blanchard admitted that the I.L.A. "appointed" his hiring bosses.

Clean Up? The commission is checking the bank accounts of some New York and New Jersey political big shots in an effort to get at the deeper causes of racketeering on the docks. The waterfront situation was bad 20 years ago and has worsened since the war to the point where even New York may be impelled to start cleaning it up.

#### Premonition

To Mrs. Georgia Crowley, justice of the peace in Fairfield. Calif. (pop. 3,118), the case was familiar, but she went to her file anyhow to reread it. The letter she drew forth was from Ensign Marvin Stuart Cohn, Naval Reserve pilot,

"The speeding ticket which I received at the able hands of Officer McDermott ... was generous in listing my speed of speedings of the speeding somewhat faster... I will be unable somewhat faster... I will be unable with the upon it. I ... if ya jet fighter airphane based on an aircraft carrier... I plead guilty [bul I would claution you to submit any financial claims rapidly because jet dying ... has turned out to be somewhat haardous. The odds are roughly assessment within the next six weeks you

will receive an 'addressee deceased' letter in return. This may sound somewhat morbid, madam judge, but it is a sound eval-

Justice of the Peace Crowley laid the letter beside the notice to appear in court, which had just been returned to her in the mail from the ensign's home address. On it was written a note: "Ensign Marvin

Ensign Marvin Stuart Cohn The odds were three to one.

Stuart Cohn was killed in his jet plane when it crashed aboard the carrier U.S.S. Philippine Sea... while serving his country." The date on Ensign Cohn's letter: Nov. 17. Date of his death: Nov. 18.

### MANNERS & MORALS Detective Story

On a trip to Richmond, Va. last spring, Edmund R. Dewing, the district attorney of Norfolk County, Mass., heard about Lady Wonder, the "Talking Horse." He drove out to Lady Wonder's stable, paid her mistress one dollar (for three questions) and was escorted into the Presence.

table 3 and was escorted into the Presence. Lady Wonder, a 27-year-old mare, can't talk a word. By pushing robber disks when her nose, however, she can pechal alphabetical population of the present and the population of the presentation of the population of the po

He commissioned a Richmond-bound friend to ask Lady Wonder where he could find the body of Danny Matson. a four-year-old boy from Quincy, Mass, who had been missing for two years. The mare tapped out: Pittsfield water wheel. Dewing sent a detective to Pittsfield, Mass. The investigator found two water wheels but no body.

Then Quincy's Acting Police Chief Wil-

liam Fernazzi got into the act. One night as he was lying in bed he decided that Lady Wonder had just gotten her words a little garbled in transmission. She had really meant Field & Wilde's water pit. an abandoned local quarry, It all came to him, said Fernazzi later\_d'just like a boot in the rear end. He hurrfed to tell Dewing.

So last week the quarry was drained and the boy's body was found.

#### The Old Sport

"Nobody was good enough for him," ried the landlady bitterly, after the cops labored up the stairs of her sleazy Queens. N.Y. rooming house to view the body of Rodger P. Stewart, 70. dead of natural causes. "Wouldn't let me in his room. He was sitting in there tonight with the window open. I said. "Dun to the body of the house!" He said, "Dun to "The his his bods in his chair with his yees staring up.

"Nothing but misery," said the land-day. The cops patiently examined the heavy figure on the chair. Rodger P. Stewart's suit had holes in the knees. His shoes were run down. There were a few prunes in the room, some stale brad and some rice. The cops listened to a recital of the old man's Spartan way of life: he had risen every day at 5, lad gone to Mass, then to a public library to read. He had no of the policemen recalled that he cadged dimes for food on the streets nearby.

But for all this, the landlady complained, Rodger P. Stewart had been "haughty." He had told her, she said with a snift, all sorts of tales: that he had been a handball champion between 1900 and 1910. that he had once run a sportinggoods business in Manhattan. Nevertheless, none of this had kept him from borrowing her radio, breakling it, and refusing

to have it fixed.

After he was gone, the old man's story continued to grow. The police pieced to-gether something of his life. He was one of 16 children of a New York policeman, had indeed prospered as a businessman. In 1935, he married, His wife developed cancer, and he took her traveling—seven thousand the control of the property of the property

Normally policemen do not investigate the lives of ragged men who die in cheap rooming houses. But in Rodger P. Stewart's case they had a sound reason. They discovered why he kept visitors out. Behind his padlocked closet door lay a Gladstone hag. The bag contained jewelry, \$0,000 worth of Singer Sewing Machine stock and \$200,000 in cash, including one \$10,000 bill.

Why had Rodger P. Stewart endured the misery of poverty with this fortune at his hand? He had suffered, it seemed, for an ideal, and like many another martyr for his fellow man. Under the terms of his will, all the money is to go to St. John's University in Brodklyn—with a request that the institution build double handball courts for its students' well being.

So did he. He scraped into World War I as a subaltern at the age of 13. made the retreat from the Somme. In 1919 he was part of a hush-hush force in the Caspian Sea area which helped defend the White Russian fleet from Bolshevik attack: "All pretty unsatisfactory from a political point of view, though great fun for a

young officer." Now he likes to say that he is the "only sensor British officer who ever fought the Russians." Between the world wars, he played polo and rode to hounds, became bayonet-fighting champion of the British army, made the 1794, Olympic carion in Palestine, where he won a D.S.O. in guerrilla Skirmishes against the Arabs. Palestine taught him "the mind and methind the part of the property of the proper

#### THREE BATTLEFRONTS

The Korean battleground which Dwight Eisenhower inspected last week is only one of three great battle-grounds in Asia. The other two are Indo-China and Malaya. In none of them has there been a formal declaration of belligerency, yet in all three, the democratic allies currently have 1.230,000 men pitted in hot war against the Communists.

Of these, 800,000 are in Korea (550,000 Americans, 400,000 South Koreans, 50,000 from 15 other U.N. mations). In Indo-Chian, there are 100,000 French and colonial troops, 20,000 sailors and airmen, 200,000 Vietnamese. In Malaya, there are 35,000 British and colonial army regulars, 25,000 fully trained Malay police and 50,000 special constables.

Korea is stalemated: the situation in Indo-China is worsening. Only in Malaya is the situation improving.

By draining U.S., British and French strength in Asia, the Communists are preventing each of these nations from pulling its weight in Europe. The Communists are fighting their Asia campaigns on a basis of global strategy. The allied coalition is not, and suffers the consequence.

to the Arab-Jewish problem: "I can remember lying in bed weeping about the tragedy of it."

In World War II, in the retreat to Dun-

kirk. he was operational commander of "Mac Force." the improvised formation covering the British right fank, and was mentioned in dispatches. Back in England he shot up to be the youngest lieutenant general in the British army. Believing he had risen too quickly, he asked for and got a combat command.

Wounded by o Piono. In Italy he soon won a reputation for realtes energy, drive and impetuosity. When patrols went out that the could interrogate the patrol so that he could interrogate the patrol commander himself. At a critical moment on the Anaio beachhead he ordered every man available—sappener, cooks, clerks—into the firing line. He setted like a real carrier of the country of the country

Speeding along the road toward Flor-

ence one day, he met a truck coming from the front with a looted baby grand piano. Seeing the general's atars, the truck driver land the piano and the seed of the piano came hurtling down on Templer's back, seriously injuring his spine. When he recovered, the war was almost over. ("Only swagely.) A pointed first military governor of the British zone in Germany, he amonunced that he intended to be "firm to the point of ruthlessness. . . I have still But that's the nature of the beast."

Claret & Crystal. War's end brought Templer full generalship. knighthood, and elevation to the Imperial General Staff. But his proudest preferment is his colonelcy of the Royal Irish Fusiliers.

Templer's father had started a collection of regimental trophies, flags, uniforms and weapons at Loughgall Manor, Armagh. Templer set up a regimental museum, restored to the regiment its original war trophy: Napoleon's eagleheaded standard, which an Irish rifleman had captured in the Peninsulat War,

Templer is the perfect picture of a British regular soldier: an austere, stiff-backed autocrat in uniform-and in mufti a bit of a dandy. He lived elegantly in London's Belgravia and became a connoisseur of claret, crystal and 17th century books. But in the company of his old war comrades he could relax. Says one: "He'll bring along an elderly fellow in civilian attire and introduce him to the officers as 'You remember Sergeant Soand-So. He and I fought together at Soand-So.' Sometimes if you happen to mention the name of a ranker he'll slap his thigh and declare: 'I knew him before his mother's milk was dry on his lips."

It was not surprising that such a man should say to Churchill: "If I make a mess of it I want to go back to the army. If I don't make a mess of it I want to go back to the army." In the Malayan jungle. fighting a cruel war, there were moments when many thought he was making a mess of it.

The Neutral Jungle. The basic fact about the war in Malaya is the jungle. "The thing that astonished me most," writes Colonel F. Spencer Chapman, an Englishman who spent three years there in World War II behind the Japanese lines, "was the absolute straightness, the perfect symmetry of the tree trunks, like the pillars of a dark and limitless cathedral. The ground itself was covered with a thick carpet of dead leaves and seedling trees. There was practically no earth visible. and certainly no grass or flowers. Up to a height of ten feet or so, a dense undergrowth of young trees and palms, but out of this wayy green sea of undergrowth a myriad tree trunks rose straight upward . . . for 150 feet before they burgeoned into a solid canopy of green which almost entirely shut out the sky."

Four-fifths of Malaya-a country about the size of Florida-is tropical forest covering mountains up to 7,000 feet high. In this jungle, inhabited by tigers, elephants, bison, monkeys, gibbons, deer and bear, alive with all manner of insects, including malaria-bearing mosquitoes, bloodsucking leeches, pythons and multicolored birds, where orchids and rhododendron flourish, there is hidden an army of about 5,000 Communist guerrillas.

In World War II the Communists. known then as the Malavan Peoples' Anti-Japanese Army, were accepted as allies. Colonel Chapman, the survivor of a British "stay-behind" party after the fall of Singapore, describes a Communist camp; "A roughly leveled parade ground, about the size of a tennis court . . . A motley guard of honor consisting of about 20 Chinese, including two girls, armed with service rifles or shotguns . . . The majority of them were under 20, and there was one boy who could not have been more than twelve . .

All the methods of Communist propaganda were employed at this rude camp; wall newspapers, political plays, tireless singing of Communist songs. When an informer was brought in, "after being burned with brands and beaten almost to death with rattans. [he was] finished off with a bayonet in the grave that had been prepared for him . Out of these surroundings came Chin Peng, slight, 31, pimplyfaced, fanatical leader of the Malayan Communists, for whose capture the British will pay \$25,000

By Any Means. The Communists had expected to take over Malaya after World War II, but the British beat them to it. In 1948 the Malayan Communist Party passed a resolution advocating "the capture of power by the peasants and workers by any means." This meant going back to their hidden jungle camps and attempting to paralyze the country's life by terrorism and sabotage. Soon they were derailing trains, cutting telephone wires, ambushing police, murdering planters and holding up schools. Unwilling to call them "Communists," the British (who had recognized Communist China) labeled them "handits"; afraid of skyrocketing insurance rates, they proclaimed the war 'a state of emergency." But a captured Communist woman guerrilla put the situation more simply to an Ipoh judge: "You win we die; we win you die.

The Malay Communists had no direct land connection with the Communists of Red China or Russia; they had British arms, parachuted to them during World War II, and some of their leaders had been trained in British guerrilla schools. Themselves Chinese, they raised money by extorting it from Chinese businessmen. Their tirmest support came from tens of thousands of Communist sympathizers at the jungle's edge mostly poor Chinese squatters. From them the Communists got food and information

The British saw what had to be done. Said Operations Director General Sir Harold Briggs: "You can't deal with a plague TIME, DECEMBER 15, 1952

of mosquitoes by swatting each individual insect. You find and disinfect their breeding grounds. Then the mosquitoes are finished." To separate the Communists from their supplies. Briggs planned to resettle the Chinese villagers in large new settlements beyond the danger areas. Special police were recruited, the army reinforced, planters armed. But somehow the plans did not work. In the villages the Communists continued to spread propaganda and collect food. More than 2.600 bandits were killed, another 1,300 wounded. and 1,500 captured or surrendered, but still the Communist forces seemed to stay about the same. For one thing, army and police efforts were poorly coordinated. Said one police officer: "This is a dirty little war, and we never really know what is going on in time to take proper action." That was the situation General Templer

inherited last January.

Winning the People. Templer took a hard look at Malaya, and said: "I could win this war in three months if I could get two-thirds of the people on my side.' He had a directive read, promising that "Malaya should in due course become a fully self-governing nation . . . within the British Commonwealth." At Kuala Lumpur, Templer took over the hilltop King's House which is the traditional home of the High Commissioner. This was where he, his wife and two children ( Jane, 18, and Miles, 6) would be spending many months. A practical soldier, he ordered barbed wire to be set up around the house. Returning later and finding the wire unlaid. Templer picked up the telephone and called the Public Works Department,

"P.W.D.?" said Templer. "Yes, sir."

"This is H.E. Can you hear me?"

"Yes. sir."

"Are you certain you can hear me?"
"Yes, sir, very clearly, sir."

"Well then, where the hell is that

bloody wire?"
Templer told the Malayan Civil Service: "If you don't make a decision and it's a mistake, you'll be put on the next boat; if you make a decision and it happens to be a mistake, you'll be put on the next boat, but somehody'll be there to see you.

Off. Temple began touring the country in the properties of the properties o

"Do you ever go down and talk to the troops?" asked Templer.

"Of course not."
"Do you ever visit the special police?"

"No."

"Why not?"
"It's not my job."

"Well, it's true that we've got some bloody bad soldiers and some bad police in Malaya, but we've also got some bloody bad planters and you're the worst of the bloody lot! Now get the bell out of here!"

bloody lot! Now get the hell out of here!"
Wake for the Dead. Conservative civil
servants learned to fear Templer's thinlipped, tigerish sneer. Asians loved it when

he looked a prevarieating Asian politician in the eye and said: "You're a sinker." Everywhere he went he was appalled by the indolent attitude of the Europeans. He told a Rotarian audience: "You see They seldom go to the naces. They seldom go to dinner parties or cocktail parties. And they do not play golf." Even as he spoke, the Perak Derby was being run on the track at Ipoh, tim-mining capital of the worst-terrorized state in the Federa. Kuala Laumour course.

Though the local British were unwilling to face it, the fact was that old-style colonialism in Asia was dead: its wake was in progress, even if its will was not yet read.

Outside Singapore (a British Crown

Outside Singapore (a British Crown Colony), there are in Malaya roughly

Communist Chin Peng Worth \$26,000 alive.

2,600,000 Malays, 2,000,000 Chinese, and nearly 600,000 Indians, The Chinese are immigrants or the sons of immigrants, attracted to Malaya by the standard of living (highest in Asia), the high level of justice, the clean cities and good roads. Their industry had put them in control of the country's economic life, but the majority were without citizenship. Believing this to be a basic cause of the unrest, the British Colonial Office pressed for Chinese citizenship, against the opposition of the Malays and some local British. The "emergency" had brought top-level Malays and Chinese together, but had left their communities coldly self-segregated. Templer threw his whole weight into the drive for common citizenship.

Collective Punishment. But he also had a police job to do. He had been in Malaya only two months when Communist guerrillas ambushed and killed a British patrol of twelve men near the small town of Tanjong Malim. Templer arrived

in his armored car, glared at the town elders over his spectacles, and said: "It doesn't amuse me to punish innocent peope, but many among you are not innocent. You have information which you are too cowardly to give. Have some guts and shoulder the responsibility of citizenship." There was no response. Templer slapped

a 22-hour curfew on Tanjong Malim and cut the rice ration. Work stopped. Villagers had only two hours a day in which to buy food. British soldiers went from house to house, handing out a questionnaire. In Chinese, Malay and Tamil, Templer wrote: "If you are a Communist I don't Malay and Tamil, Templer expect you to reply. If you aren't, I want you to give . . . as much information as you can to help my forces catch the Communist terrorists in your area . . . itemized the questions, then added: "It's quite safe for you to give all the information, since every household must hand in a form like this and none will know which comes from which house.

His soldiers collected the questionnaires in sealed boxes, which Templer himself opened. Some of the letters contained only insults. But a few days later 28 people in Tanjong Malim and in a village near by were arrested. After 13 days the curfew was lifted, the rice ration restored, and the people of Tanjong Malim went

back to work.

An Element of Morality? In London, Templer's action provoked a storm. "Lamentable," said the Observer. "Odious," asid the Machester Guardian. In the minded of the notorious Black & Tans, and said acidly: "It is not a bad idea to introduce an element of morality when you are trying to govern a country," Said Lord Listowel: "Collective punishment will turn under the company of the

But Templer kept on being tough, regardless. Soon his toughness began to tell. At Ipoh. three men in tattered uniforms, poor shoes and sugarbowl haircust ran out of the jungle, crying: "We are bandits surrendering." Fed and allowed to go back, they brought out ten comnades, including a 19-year-old girl who sidd: "I want to forget all about the nightname."

since I foolishly left home.' The British colonials began to surrender too. In Kuala Lumpur, the posh Lake Club had refused admission to the Sultan of Selangor on the grounds of his color. Said Templer, in cold fury: "For the security forces of this country, there is no such thing as a color bar . . . British boys, Rhodesians, sturdy Gurkhas, Africans and Fijijians . . . are all risking their lives side by side with Malays, Chinese and Indians . . . These men see their real enemy-Communism. They also see their real friends, and know that the things they are fighting for transcend any differences there might be of skin or color or custom." The club committee resigned in a body, and their successors endorsed a new policy of interracial friendship. A few weeks later the Malay Federal Legislative Council passed a bill (which

nine Sultan-controlled states had already ratified) laying down conditions of citizenship for the Chinese. To the surprise of the Malays, some 1,200,000 Chinese qualified. It was another triumph for Templer. But the long-range implications are tremendous: in the projected British Dominion of Malaya, which presumably will include predominantly Chinese Singapore, the balance of power will lie with the Chinese population. Thus Britain quietly envisages adding a Chinese country to the Commonwealth, a counterweight in troubled Asia. When they fully understand this, the Malays may be expected to complain. Templer is working on an answer to that one.

Turset Smiles, It is no longer supprising for anyone in Malaya to see Sir Gerald and Lady Templer rolling down the most with their smiling heads sticking up out of an ammored cast turnet. No soldier, servant knew the Templer might appear, demanding accurate answers to sureastic questions. In his air-conditioned office in King's House, he plotted daring innovations in querilla warfare: planes which By over the jungle broadcasting recording by over the jungle broadcasting recording poison super to clear the roadsides of

ambush areas.

His main occupation now, however, is the country's social services: getting more doctors and nurses into rural areas, organizing training schools for student teachers. There was one project he could turn to with all his soldier's heart: the creation of a 240,000-man Malay Federation army, of Malays. Chinese, Indians and Euragians. He saw it as the prerequisite of self-government, and was disappointed when the Chinese held back. He is also deep in such unsoldierly problems as rural industrial development and low-interest loans for local cooperative societies. The sensational fall in the price of rubber, as a result of a falling-off in U.S. purchases, distressed him. More even than the guerrillas, that might spell disaster for all his plans.

It is a measure of Gerald Templer's success that in less than one year he has been able to turn from quick skirmishes against disaster to slow battles for Malaya's peaceful future, "We are beginning to get the shooting war under control said Templer. "Deserves highest credit," said the Economist. "Staunch service." said the London Evening News. "An absolute ace," exulted Colonial Secretary Oliver Lyttelton, In London to report to Churchill on his "full powers, sparingly used," he faced the press in a Colonial Office room overlooking Westminster Abbey. Dressed in a neat, dark, doublebreasted suit, with blue & white striped shirt and stiff collar, he did not at first glance look like a man who had just flown in from the jungle. But there was a brown sweater under his waistcoat-a concession to chilly London-his 6-ft. frame was down to 147 lbs., and his slicked-back hair was greyer.

The substance of his report: Malayan

guerrillas are on the retreat. To use their own "beastly jargon," the Communists' "situation has become malignant" since "the regrouping of the masses." In October there had been 36 contacts between police and terrorists, and 35 terrorists had been killed. The Reds were shifting their tactics to "insidious subversion."

When he had finished, the reporter from the Community Daily Werber saked him if his collective punishment policy was not the same as that used by the Nazis. Templer's lip curied into a smile like a soundless nart. Grimly he recited the proasic, ghastly facts & figures he had had to deal with. "Il notice you do not deny using the Fascist system." said the Daily Worber reporter. "Didn't hother Daily Worber reporter. "Didn't hother porter asked." #### BATTLE OF INDO-CHINA Siege of Nasan

A three-quarter moon shone down on the miles-wise, heavily fortified French perimeter at Nasan, south of the Black River. In the lumpy hills around Nasan lurked 20,000 Viet Minh Communist guerrillus. For several nights the French Union troops had expected attack. They crouched in their holes, not smoking, talking in whispers, waiting. The moon glinted on gun barrels, steel helmets, barbed wire.

One night last week, a few minutes before midnight, the Reds blew their bugles. Then they attacked, driving thick-packed herds of water buffalo before them, to clear paths through the mines and punch holes in the wire. The French put down a dense curtain of fire from light and heavy weapons, including 105-mm, howitzers;

pler: "I haven't the vaguest idea." The reporter: "Why don't you? You're High Commissioner, aren't you?" Templer said quietly: "You sit down. You sit down, or get out." The Communist sat down.

It was Templer's day—a triumplant return though his acidulous manner did not show it; long ago he had learned never to drop his guard, or to expose a lurking sensitivity inside. The tough, tired soldier had told Churchill he wanted to get back to the army when this job was done. But he was thinking now of a more peaceful haven than the army. "If don't like this world," he once remarked in the standard of the st

With Una Slim (left), daughter of Britain's Chief of the Imperial Staff Field Marshal Slim leaping, screaming, the Reds answered with machine guns, mortars, bazookas, recoilless rifles. Bearcats and B-266 from Hanoi arrived to light the horrid scene with flares, to strafe the swarming guerrillas and sear them with napalm.

They died by the dozens but still they came on. By 3 m. they had overrun two hillton posts on the perimeter's north face, finishing off the Morocan and Thai defenders with knives bayonets machetes, grenades. Within minutes the Viet Minh were putting mortar fire on Nasan's vital airstip. Next day the stackers had backed off of one hill, and French paratreopers recaptured the other.

The French Union forces had lost 200 dead, and the Communists more than 500. The French claimed a victory, but it was at most an inconclusive one. Sadeyed General Raoul Salan was convinced that even if the airstrip became unusable, the French could still supply Nasan's defenders indefinitely by airdrop.

By its latest action, The has before to prepare itself for the rights & duties of a United States of Europe, should that day ever come.

#### UNITED NATIONS

#### Trouble in Tunisia

The words of a severe argument in the United Nations were punctuated last week by the chatter of a machine gun 4,400 miles away from the U.N.'s Manhattan debating halls.

On a lonely stretch of road six miles from Tunis, assessins poured a stream of bullets at a man driving past. Next morning his body was found, crushed and unrecognizable. The authorities identified him as the most formidable Tunisian nationalist leader still at liberty in the land; Farbat Hached, 39-year-old head of the 100,000-strong General Union of Tunisian

Workers.
French authorities on the scene blamed extremists for the crime, and used the occasion to lock up a dozen top nationalist and labor leaders. The Tunisians blamed the assassination on what they said was a secret terrorist organization of resident Frenchmen called "the Red

Hand.

Hached's union called a three-day strike.

Three hundred Arabs trying to march of
the headquarters of the French Resident
General clashed with police. In French
Arabs Killed Seyem Frenchson, horsily
mutilating some. Then, as the Arab moles
surged through the streets of Cashalanca
leoking for trouble, police opened fire on
them, killed at least 40.

At the U.N., where 13 Asian and Arab nations are demanding U.N. intervention to give Tunisia its independence from France, buth sides used the assussination to support their argument. Arabs and Asians called it the product of "a wave of terrorism" inspired by French rule. Britian and Belgium, colonial powers like France, said the crime is a sample of increasing terrorism to come if the U.N. insists, in violation of its charter, on interfering in a matter that falls within the internal jurisdiction of France.

France itself continued to boycott the U.N. discussion after insisting that it would pay no attention to any U.N. recommendations. The U.S., which had intrinated the colonial powers by voting for U.N. discussion of the case, infuriated both sides by refusing to tell where it

ably short of the estimated plan . . . for 1952."

G"The coal mines in October fell 122,000 tons short of their target." Chiar
reason, said Gero, an "anti-machine attitude" on the part of the workers.
G"The extent of substandard work in
Isome I steel-rolling mills is outright in-

tolerable."

Bulgaria. Radio Sofia found industry suffering from a "barbaric attitude towards machines." Wrote the Communist Rubotnichesko Delo: "In the Balchik tractor station. combines were left in such

tor station, combines were left in such condition that wheat began to grow in them." The Minister of Agriculture abjectly confesses that the 1952 tobacco and wheat crop has been cut down by drought to ,79% of last year's harvest. The Ministry of Electrification limited every household in Sofia to one light bulb.

Rumania. A cold and hungry winter is in prospect. To "remedy...the shortage of fuel," the Communist Council of Ministers ordered the peasants to "make full use, as fuel, of agricultural waste, sedge, and other materials."

KOMEKON's statistical charts report that East Europe's coal and steel production is booming. But it has no room, and feels no need to footnote the human strains and suffering.

#### WESTERN EUROPE

The Fateful Hour

Night fell and lights were snapped on in the big, modernistic debating, hall of West Germany's Bundestag, Wearily and warily the Bundestag debated the most important decision in its brief history—a vote on the treaties which will end the occupation, in exchange for a West German promise to rearm.

From the rostrum spoke the dry. soare.

From the ristordin space use offy-space, To-year-old Chancellor, Kornad Adenuaer, Ordinarly icy and unemotional, Adenuaer summoned up all the passion and eloquence he could muster. "It is the state the crosscords of slavery and freedom, A vote of 'no' on these treaties means. A vote of 'no' on these treaties means yet to Stalin ... Germany's position is more exposed than ever before in her history. Germany is divided and torn, disarmed and defenseless She is overshadowed by a colosus that is trying to

enslave and swallow her."

After Adenauer had spoken, the required "second reading" of the treaty bill, and the third and final vote of ratification, seemed mere formalities. Even opposition deputies conceded that the Chancellor had

it in the bag.

Next day, to everyone's surprise. Adenauer, the man who had appealed so urgently for fast action, discomitted his supporters and confused his opposition by announcing postponement of the final traiffication vote. He wanted to wait, he said, until the Federal Constitutional Court can rule on the constitutionality of a simple majority vote on the treaties power the Socialist opposition, has long challenged. The court's deliberation will probably take about a month.

The maneuver threw the Bundestag into an uproar. Adenauer coldly demanded that the deputies proceed with the second reading and thus demonstrate their good faith to the Allies. After two stormy days, with the speaker's brass handbell jangling almost constantly to bring order, the house obliged, Chubby Erich Ollenhauer, successor to the late Kurt Schumacher as leader of the Socialists, angrily urged the Chancellor to abandon his "teen-age enthusiasm for European unity" and start working for the interests of Germany. The Chancellor listened to all of this stonily, and seemed to take as a matter of course the handsome 50-vote majority with which his treaty proposals passed their second reading.

Confident that West Germany had thereby made its "political decision" to rearm and join the Western Allies. Chancellor Adenauer sqt back confidently to await what he assumed would be an equally approving court decision.

#### SOUTH AFRICA

Death the Leveler

Nature, in whose eyes all men seem equal, last week tore down—at least for a little while—some of South Africa's walls

of prejudice.

All day long, the clouds had billowed above Johannesburg; in the late afternoon lightning split a sky that was the color of an overripe plum, and the city's jagged skyline vanished behind a curtain of steelbright rain. Eighteen miles away, a tornado struck the mile-square shantytown of Albertynsville, where 5,000 Negroes and half-castes lived in mud huts. For an instant, the growling air was filled with flying tin roofs; then the pelting rains crumbled Albertynsville's mud huts into a slough of grey ooze that flowed like lava, choked with sticks of furniture, rusty pots & pans, and here & there a corpse. The toll was: 20 killed, 400 injured, 4.000 homeless.

To the Rescue. Minutes after the storm, Johannesburg Bronc-borm mayor, 45-year-old Hymic Miller, sounded an appeal for help. Ambulances and double-decker city buses raced down the veld enough shoes, clothing and blankets poured in to supply (wice the number of homeless. When Mayor Miller appealed for emergency blood donors, thousands of Johannesburgers streamed out of movie theaters and cockual loanges to line; the centers, and the strength of the strength o

Few of those who rushed to Albertynsville had ever before set foot in the Negro shantytowns barnacled on to the goldrich Rand hills. Stumbling through the debris, oftentimes unaware in the darkness whether the man beside them was white or black, the whites learned, painfully and humbly, how black South Africa lives. Some fetched water from filthencrusted boreholes that had served the whole of Albertynsville; others, ladling out Red Cross soup, porridge and stew to matchstick-legged Negro children, discovered that never in their lives had these children tasted anything so nourishing. Said one white rescuer afterward: "The place had no drainage, no sanitation, no streets and no lighting. Outside the houses. there were open latrines, pits and great piles of rotting rubbish, swarming with millions of swollen flies, Albertynsville." he added solemnly, "must not be allowed to rise again.

Out of the Pits. Mayor Miller agreed. He called an emergency meeting of his city council at 8 a.m., launched an Albertynsville relief fund that topped \$45,000. From Prime Minister Daniel Malan's Nationalist cabinet came an offer of temporary shelter for the homeless in the desired with the council of the

squads charge Albertynsville's shanty dwellers 5 shillings a month 'protection' money, threatened to beat up any Negro family moving to Lenz. But not for long: protected by Mayor Miller's cops. 1:000 homeless Negroes left their camp fires in the open yeld and moved to Lenz to sleep, for the first time in their lives, in electriclit bungalows, with running hot & cold

At week's end, cheering crowds met Hymic Miller as he and his white councilmen visited what was left of Albertynsville, "It's a long time since Negroes cheered a white man," said one surprised Johannesburg official.

Battle on the Floor

Afte, the dinner hour one quiet evening last week. Demo-Christian Deputy Oscar Scalfaro stood up in the Italian Chamber of Deputies and made a motion: let the House sit seven days a week to speed from bill. Up popped Socialist Fellow Traveler Pietro Nenni to cry: "The majority is attempting a coup." Communist Boss Palmiro Togliatti, discarding his usual pose of blue-serge respectability; shouted: "This isn't a Farliament. It is a bix-control of the back to your Soviet Parliament, Togliatti. Your game will be up there." The falls was on.

Narrow Margins. As the two sides of the House made for each other, shouting curses and grabbing handy weapons, the speaker summoned help on a siren called la Martinella. A phalanx of strapping ushers rushed in. Prohibited from laying hands on the honorable members, the thin line of frock-coated ushers compromised by kicking shins. They were swept aside as the factions closed, fists waving, drinking glasses hurtling, chair legs thudding on skulls. From his seventh-row plush seat, Red Chief Togliatti, carefully guarded by a Red deputy, watched with a connoisseur's interest. Premier Alcide de Gasperi, 71, in the front benches, prudently retired to safer ground.

The scuffle was part of a deadly earnest battle between De Gasperi's government and its powerful Communist opposition (128 members). An election is coming with spring; the Demo-Christians expect to the communist have gained strength since 1048). Narrow margin might be tolerated in England, where the opposition is demo-cratic; but could Italian democracy survive and effectively govern if the Community of the Com

De Gasperi's electoral reform bill proposed that the winning party or coalition of parties be given a bonus of additional seats, sufficient to give it at least 6.5% of the total number of seats, enough for a working majories. If passing the bill was important to the Demo-Christians, defeating it was imperative to the Reds.

Crocked Heods. Communist Walter Audisio, who likes to boast that he was Mussolini's executioner, sped to the clerk's the community of the comm

After 20 minutes, peace returned to the chamber, now slopped with ink and blood and littered with glass shards, torn paper and shredded shirts. One usher went to the hospital with a brain concussion; a Red sported a two-inch-deep gash in his scalp; a Demo-Christian nursed a badly bruised abdomen; the House first-aid station impartially bandaged Red heads and court-plastered Demo-Christian faces.

The next morning, both sides proffered formal apologies. Deputies noted that their desks had been fastened to the floor, and inkwells prudently removed.

pered the air with further opprobrium: an ambiguous reference to "cosmopolitan-ism." which is a word the Kremlin likes to hurl at Jews. Laborites booed and hissed as Churchill started to stride out of the House. "Is it in order to boo a member of this House?" he demanded truculently. A scathing Scottish voice gave his answer: "What else can you say to a search of the control of

Next day, he was Britain's confident lion, meeting with eight Commonwealth Prime Ministers and Finance Ministers who had come to London to discuss the problem of how to strengthen the pound sterling.\* As banker for the whole Commonwealth, he had good news for them: a sterling area solidly in the black last November, and backed by a \$128 million surplus. But the good news was tempered with a startling announcement. To keep the recovery solid, said Churchill, Britain has decided to slash its defense spending by as much as 29% in the next two years; the original three-year rearmament program would now take up to five years. That announcement, made to Parliament by a less forceful Prime Minister, might well have rocked the nation's confidence. Secure at 78 in his role of jealous guardian of the nation's security, Winston Churchill made the announcement without a question from any member in the House.

Too Old for Christmas

Parisian news photographers, Montparnasse salesgirls and, above all, thousands of confident, confiding children agreed as one that benevolent old Adrien Claude was the best Father Christmas that Paris had ever seen. His flowing white beard and the kindness that danced in his twinkling blue eyes were as genuine as those of the legendary Christmas saint himself. When Adrien made his appearance last year in the toy department of one of the biggest department stores on the Left Bank, children left the firm grip of parental hands with a shout of joy to clamber into his lap, pull his beard and whisper their hopes into his ear. As far as the merchants of the Left Bank were concerned, the definitive Pere Noël had come to Paris to stay. Adrien's own old heart was bursting with happiness and good news to take to his wife Pauline in the hospital along with the little presents of fruit and candy he always brought her.

Good news had become a rare luxury for Pauline Claude and her Adrien. Eight years ago they had both become too old and feeble to hold their jobs any longer

\* On his doodling pad, Australian Prime Minister Menzies put the problem thus:

A quid for every quo.

PÉRE NOÉL Shoes for a saint.

as Joist caretakers of a rickety apartment house. Soon afterward, Pauline had gone to a permanent bed in the hospital. Adrien himself had become too weak to do even the odd jobs that were left to him. The presents he broaght his wife on his regular without meals himself, Vet., childless for all years of marriage, they both loved children, and their greatest happiness came each year at Christmas time when Adrien was asked to don his red suit and parties and small, out-of-the-ways shops.

One day last month, as the Christmas season rolled around again, Adrien Claude stopped by the hospital as usual to see his wife. She lay in bed, staring straight ahead. "I am sorry," said the doctor to Adrien. "She does not know you any more." Adrien stared and stared, then he shuffled away, his legs moving uncertainly, his hands shaking, his face drawn and haggard. The department store manager regretfully allowed him to quit, got a new man to play Santa Claus. Children clambered obediently to his lap, and business went on as usual. But, from time to time, a palsied old man with a white beard could be seen peering anxiously in the store window only to shuffle away with head bent. A salesgirl thought she recognized him, but she could not be sure.

One day last week, after his old-age pension had come in Adrien Claude paid off his last few tiny debts. "I am too old for Christmas," he told a friend as he gave his obtained the control of the contro

PRESIDENT PAZ ESTENSSORO

#### BOLIVIA Republic up in the Air

Way back in 1868, so the story goes, Oueen Victoria settled the Bolivia problem in her own imperious way. General Mariano Melgarejo, the Bolivian dictator of the day, had urgently invited the British Minister to attend a reception in honor of the general's new mistress. When the diplomat frostily declined, the affronted dictator had him tied aboard a donkey. facing aft, and trotted him three times around the main square of La Paz. The minister fled home and told Queen Victoria of the outrage, "Where is Bolivia?" the Oueen demanded. A map was brought and the Queen was tactfully shown that La Paz was much too far inland for the guns of a British man-of-war to force a suitable apology. So-says the legendthe Queen took a pen, scratched a few lines across the map and declared: "Bo-

livia no longer exists." Last week the picturesque, landlocked mountain republic of Bolivia was back on the map as never before in its obscure but violent 127-year history. Climaxing a long and bloody struggle, a new revolutionary government had nationalized the country's three big tin companies and placed their mines under a new, government-run Bolivian Mining Corp. It was the most important act of nationalization in Latin America since Mexico seized the foreign oil companies in 1938. For better or for worse, it made the nationalist government of President Victor Paz Estenssoro the most important since Simón Bolivar founded the republic in 1825.

The Hend Thot Feeds. The audacity of the nationalization act, asy Bolivia's super-heated nationalists, was equal to the super-heated national the

Starting at the turn of the century, when the world developed a ravenous tin appetite (for food containers, automobile bearings, welding). Simón I. Patiño. a cholo (half-Indian) from Cochahamha. parlayed an abandoned Bolivian tin mine into a fortune estimated at a cool \$1 billion. His annual income used to surpass the government's. He formed a world cartel, bought heavily into Malayan tin, and lived abroad like an emperor, marrying his son Antenor to a niece of Spain's Alfonso XIII, his daughters to a French count and a Spanish grandee of such exalted lineage that he was entitled to keep his hat on while chatting with his king. Making himself Bolivian minister to

AYMARÁ FIESTA, honoring a patron saint of Huarina village, brings Indians out in rented costumes for a prolonged dancing spree.

THE YUNGAS' fertile green valleys, plunging east from the sear altiplano, produce citrus fruits, vegetables and coca (cocaine).

LAVISIT ESTATES, like La Glorieta near historic Sucre, are lingering reminders of impoverished Bolivia's rich Spanish heritage.

France (to avoid the nuisance of paying French taxes), old Simón handsomely built his own legation—plus palaces in Biarritz and Nice—and three Bolivian mansions, costing \$50 million, two of which he never even saw before his death in 1947.

Though son Antenor now heads the empire, he spends much of his time fighting separation suits with his Bourbon wife (current agreement: \$50,000 a year) and getting into the tabloid press with various international beauties. Most active of the tin barons nowadays is shrewd. old (71). German-born Mauricio Hochschild. Reported to carry three passports (Bolivian, Argentine, Chilean), he operates mostly from Chile. Though not nearly as rich as the Patiños. Don Mauricio is not pinched for spending money. When Pan American's Stratocruiser El Presidente was delayed by engine trouble in northern Brazil last year, he radioed the rival Panagra airline to send a DC-6 from Miami to fly him and his wife straight on to New York. It was just about the costliest private charter flight on record-\$40,000, at \$1,500 an hour. Don Carlos Victor Aramayo, another second-generation tin baron and owner of La Razón,

The Hand that Digs. In classic contrast to these old-school enterprisers are the 35,000 Bolivian Indians who gouge the tin from the Andes' granite flanks, more than two miles above sea level. One such is Sabino Pérez, 41, a loader in the newly nationalized Patiño tin mine at Huanuni, Sabino, once a farmer, took the job five years ago, thinking that savings from his \$1-a-day wage-Bolivia's bestwould soon enable him to buy a plot of windswept altiplano soil. But the temptation to swap merchandise from the company store for consoling chicha (native corn beer) proved irresistible. After deductions for store purchases and social security, his cash pay has averaged less than \$1 a week, but will improve somewhat after the wage rise ordered upon nationalization.

April, now makes his headquarters in

For such pay the miners work eight norm underground in all-but-unbearable conditions. Some mine galleries driven deep into the Andreage is not that drill-ers work in naked pairs, taking five-mine under the season of the season of the season in the season of the season in the season

lieve they are stealing the tin.

Highland Home. Above the slopes, where derby-hatted women miners pick and sort the greyish-blue lumps for milling, are Huanuni's strings of company-built miners' homes. Over a cow-dung fire. Sabino Pérez wife cooks the evening

meal of potatoes; because of the low boiling point at 12,800 feet they come out of the pan almost as raw and hard as went in. Blue-cheeked children huddle inside the windowless, dirt-floored, one-room hut to escape the biting mountain wind. Within are a bed, two chairs, and a four-inch figure of the Infant Jesus on a homemade altar; magazine pictures of bathing beauties, futbol players and stern-faced priests are tacked indiscriminately around the walls. The house has no water or sanitary facilities: the nearest public bath is six miles away, but Sabino and hls wife have not visited it this year. The only sign of civilization that the second biggest tin mine in Bolivia has brought to Huanuni is a 25-watt lamp that hangs incongruously from the thatched roof.

Bolivia is packed with such stark contrasts. It is a country of majestic moun-

SIMÓN PATIÑO
An emperor abroad.

tain scenery and miserable human squalor, of tremendous natural resources and examples of their wretched neglect and abuse. To the west, condors soar over abandoned Spanish silver mines near icv. blue Titicaca, highest navigable lake in the world; in the remote east, ranchers graze their gaunt herds in a jungle reputed to be floating on oil. The Bolivian land itself is split in two-the barren. windswept uplands, fenced about by the snowy Andes: and the vast, green east, an unpopulated, trackless region of plains and jungle whose rich soil could easily feed all Bolivia if the mountain Indians would only move there.

March to the East. Brutal as any conreast of geography or industry is the cultural chasm between Bolivia's Indians and the whites and mestizos of the cities. The Indians, the vast majority of Boliviais 3,200,000 inhabitants. live quite outside the national economy, even speaking Aymará or Quechua instead of Spanish. At home on the high, forbidding plateau since before the time of the Incas, they have developed oversize lungs to be able to live and work, dance madly and play reed pipes, get drunk and breed children in the cold, thin air. Their wants are simple. If they have any money to spare, they sew it up in a piece of cowhide and bury it. A storekeeper who has dealt with them for years gives this comprehensive list of the things they buy: cotton cloth for shirts, plow points, dve, thread, needles, old automobile tires to be cut into sandals, sugar, chocolate, rice, macaroni, aspirin, second-hand sewing machines.

Can the half-million modern Bolivians bring these backward highlanders to the ways of the western world? Amid the faded red-tile roofs of La Paz (pop. 321,-000), world's highest capital, rise such steel-and-glass skyscrapers as the 14-story University of San Andrés. Shaggy llamas shuffle indolently to the side of the capital's steep, cobbled streets to make way for Fords and Cadillacs, Government officials, demanding emancipation from the tyranny of tin, urge Bolivians to look eastward to the regions where the Andes fall away in giant green gorges called yungas to the Amazonian jungles and Chaco plains, With the aid of a \$26 million U.S. Export-Import Bank loan, Bolivia hopes to finish a highway linking the mountain cities with Santa Cruz, capital of the plains, by late 1953. Brazil and Argentina are busy building railroads across the Chaco (see map) to open the area to the Atlantic. Bolivian nationalists, sponsors of a "March to the East," talk paradoxically of luring foreign capital to develop the long-neglected oil of the Chaco.

179 Revolutions. But as Bolivians themselves say, theirs has been a land of the future for four centuries. Since Bolivar won them independence, they have had 179 revolutions, an average of one every nine months. They have lost four wars and half of their territory. Their outlet to the sea was lost to Chile in the "War of the Pacific" (1879-1884).

After the last bitter defect by Paraguay.

in the Chaeo war (1932-15). Bolivians took up ideas of social revolution from both right & left, Marsist socialism penetated the universities, Officers of the defeated army organized totalitarian distorships. De delicator, pro-Nail President Gaulberto Villaroel. was overthrown after World War II in a fashion so violent that all the world remembers him—hanged from a lamp post before his palace. The downtrodlen tin miners, finding a leader minded ersoccer star named Juna Lechin, rallied to his union and fought bloody battles with Company-paid army garrisons.

In 1951. Villaroel's Finance Minister. Victor Pax Estenssoro, ran for the presidency from eall ein Buenos Aires. He won, only to have the result set aside by an army junta that grabbed power. Egged on by the tin firms, the junta risked the collapse of Bolivia's tottering economy to wage a war of bluff with Stuart Syming.

The National Browing Co. Baltimore 24, Md.

Look for

everywhere!"

ton, then head of RFC, trying to force him to buy Bolivia's tin for the U.S. near the Korea-scare price of \$1.90 a lb. Soon food ran short in Bolivian cities. Paz's nationalists shouted: 'Bread for the People!' and raised him to power in a bloody revolt last April.

Professor in Power. Here was no halfiterate army bullyboy. Pax was one nationalist fanatic who talked cold business like a businessman, a former economics professor who had balanced a budget with his economist's eyes wide open. Dictator Pax took the plunge by nationalizing in at once in spite of his empty treasury. It was a political decision. "You force to the plunger of the plunger of the plunger of the professor of the plunger of the plunger of the professor of the plunger of the plunger of the professor of the plunger of the plunger of the political political decision. "You force of the political decision." You force the professor of the plunger of the plunger of the political plunger of the political plunger of the plunger of the plunger of the political plunger of the plunger

Isolivains are united behind his action as they have not been in years. They are generally convinced that 1) the companies were bigger than the state, 2) the companies were draining away resources without investing the profits in Bolivia, and 3) the tin barons themselves, particularly the heirs of Patifio, were living lives of luxury in the outer world while seoming their own country.

For all the finality of Paz's nationalization decree, the tin companies are still fighting back. Because the bare book value of their property exceeds \$60 million, they scoffed at the \$22 million offered as indemnification by the government. They denounce the government's recently presented "bill" for \$505 million in unaccounted-for foreign-exchange funds as a brazen pretext for outright confiscation. They have not accepted the government's invitation to negotiate indemnification which would include Patino's U.S. minority stockholders. Their apparent strategy is to wait until the stoppage of tin sales-through unofficial world embargoes or through the U.S. Government's refusal to buy-brings the regime down.

The U.S. seems caught in the middle. To make a go of his gamble. Pas needs foreign technicians, credits to buy supplies, peace with his miners, and a long-term contract for sale of Bolivia's tim. With huge private investments already with huge private investments already tries as Venezuela, the U.S. cannot open-by condone Bolivian nationalization. The RFC, which resumed buying Bolivian tiat 31:173 all has 1 after Pais revolution, asopped when nationalization occurred. We will be supplied to the world a surplied to the U.S. cannot personal properties of the world's newadays, but the sole supply in the western hemisphere ji sessential to the U.S.

sphered seems to be the T Can Pag, in a country whose whole history is a record of failure, achieve the miracle of making mationalization work? The first obvious threat to him is an army comeback. Obvious the third of the third work of the third work all had destroyed by the April revolution and, with the country behind him. Pag. is probably afe against any rightist coup for a year or more. But what will couple for a year or more, that working for the government is

JUAN LECHIN
In the cabinet, a time bomb.

sadly like working for Patific? When the Paz regime was organized, a diplomat observed: "There is a time bomb in that cabinet, and his name is Juan Lechin." Now Minister of Mines as well as boss of the tin miners' union. Lechin is the second most powerful man in Bolivia.

So far Paz has been able to control and even use him. But back of Lechin are Communist libor leaders, who also plan to use him. Such Marrists are specialized to the control of the control of the allowed already been noted on the aliquano. If Paz shoots the nationalist wad and fails, the door to Marrist revolution may be the door to Marrist revolution may be in Bolivia will indeed be back on the map of the world's trouble spots.

# BERMUDA

#### A Star Goes Down

Her throttles wide open, the Star of the East, a DC-4 of Pan American World Airways' Cuban affiliate Aviacion Cubana. roared northeastward out of Bermuda's Kindley Field before dawn one day last week. Just after the take-off, one of the four engines of the Madrid-to-Havana plane faltered. "I was just going to run to the front of the cabin and warn the passengers when we hit the water." Steward Orlando López Suárez later recalled. "The tail broke off . . . I found a rubber dinghy. but it was punctured and would not inflate . . . then the plane sank and I guess the other people sank because they had their seat belts fastened.

A Bermuda pilot boat, the U.S. Coast Guard cutter Yakhati and a Kindley base crash boat raced out through whitecaps, pulled four survivors (including the steward) from the edge of a circle of burning gasoline 500 yards across; 37 others were drowned or burned to death.

# WHY YOUR WIFE'S HANDS ARE SMOOTHER THAN HER MOTHER'S WERE

A peek inside one of the world's largest laboratories devoted to making your wife's life easier

What you see here are three girls dunking their arms in metal troughs. Inside the troughs are two different kinds of suds. After thirty minutes of this, the girls will get up and go back to their regular jobs in Proeter & Gamble. As a result, your wife may have softer, smoother hands.

Here's how it works. Before we put any new hand-smoothing improvement in one of our soaps or detergents, we try it out on people—like these patient girls. No matter what our scientific tests show, it's no improvement in our book if it doesn't please people when it's tried out on people.

Such homely, down-to-earth checking of complex laboratory findings has resulted in more than 20 improvements for making our products milder. Each change has helped keep your wife's hands smoother than her mother's were,

We're proud of that record. But not satisfied. We keep right on improving what we make, because competition just won't let us stand still. We're not complaining. Our company makes progress that way. And so does your wife.

That's the reason behind our "people" research.

O YEARS O. O. 904 PROOF

# It takes all kinds of engineering to deliver the goods

Here at General Motors we are engaged in producing many types of transportation other than passenger cars.

These include trucks, buses, railroad locomotives and tanks; also power plants for tugs, fishing boats, submarines, construction machinery and even airplanes.

Each of these applications calls for highly specialized engineering, for in modern transportation good engineering can spell the difference between profit and loss.

That is why GM employs more than 38,000 research scientists, engineers and other technical men — to keep ahead of the times in developing new engines and vehicles for the more efficient carriage of people, goods and guns.

Examples of this are two recent GM advances: a new 2½-ton Diesel truck that brings the economy of Diesel power for the first time to millions of users of smaller trucks—and America's first Turbo-Prop engine for military and commercial aircraft.

Experience gained in fostering developments like these benefits all GM products by adding to our pool of knowledge. An improvement in tank transmissions worked out today can help make a better truck for you tomorrow.

That is why GM engineering is the key to better transportation—for pleasure, work and defense—on land, on sea and in the air.

# MUSIC

# Wordless Menotti

In Philadelphia last week, famed Violinist Efrem Zimbalist, 63, came out of a three-year retirement to solo with the Philadelphia Orchestra, His reason: he wanted to play the world premiere of Gian-Carlo (The Consul) Menotti's Violin Concerto in A Minor.

It turned out to be a happy decision for everybody. The songful style that marks Menotti's operas was apparent in the concerto, and its easygoing expression was well suited to Zimbalist's delicate tone and refined phrasing. For Philadelphians it was pleasant listening; the audience gave a rousing round of applause to the

soprano, since two earlier ones are teetering on the vocal edge of manhood) and a concert performance of The Consul in Philadelphia next month. After that he will concentrate on the score and libretto of The Saint of Bleecker Street, which "may take me five years. I don't care. I have been reading about saints. It is very

Holy Night, 1952 Across the U.S. last week, air waves. nurseries and barrooms echoed with a song called I Saw Mommy Kissing Santa Claus, To a tune that is basically old reliable corn syrup, with occasional chorus and chime effects added, it tells the story of

ZIMBALIST, ORMANDY & MENOTTI Sick stomachs for two.

violinist, the composer and Conductor Eugene Ormandy.

The concerto is Menotti's best instrumental work to date (though he himself still prefers his 1945 Piano Concerto in F). It has humor and a touch of drama, and a striking contrast of light & dark textures (major & minor) unifies the whole piece. Its weakness is formal: the main line of progress is too full of pleasant but unrelated detours into puckish humor and free-flown fancy.

Composer Menotti enjoys the freedom of writing music without having to think about a libretto. "After I get a couple more operas out of my system I will concentrate on concert music alone," he says, "But I'll never write to a deadline again. Trying to finish the concerto in time, I had a sick stomach for days. Zimbalist only had three weeks to memorize his part. He had a sick stomach, too.'

For the present, Menotti will be busy directing new performances of his operas: Amahl and the Night Visitors for TV on Christmas Day (he had to find a new boy a child who does some Christmas Eve snooping when he (she) should have been asleep. Nothing else in the lyrics is quite up to the title-line. Sample:

She didn't see me creeb Down the stairs to have a peep, She thought that I was tucked up In my bedroom fast asleep.

But record buyers are finding it irresistible: in less than ten weeks, more than 2,000,000 records have been released by Columbia, Victor, Decca, Capitol and M-G-M. By all signs, it should be an even greater success than the 1948 hit, All I Want for Christmas Is My Two Front Teeth.

Columbia got a head start on the others. and has already sold more than 1,000,000 copies to U.S. dealers. This makes something of an overnight national musical figure out of Columbia's vocalist: a twelveyear-old freckle-patch named Jimmy Boyd, of Van Nuys. Calif., who has had his own radio program in Los Angeles and is a veteran of five years in show business.

Warren: RCA Victor Orchestra and Robert Shaw Chorale conducted by Renato Cellini; Victor). Some of the Metropolitan's stars in an "unofficial" version (the Met's contract is with Columbia). This one is notable for a magnificent recording job, the singing of Soprano Milanov, and some rousing choruses, including the Anvil. Other new records

Willy Burkhard: Toccata, Op. 86 (collegium Musicum. Zurich. conducted by Paul Sacher; London). One of Switzerland's leading composers turns in a score that combines imagination with some down-to-earth counterpoint. Strings predominate, but winds and percussion give striking punctuation.

Beethoven: Pigno Concerto No. 3 (Benno Moïséiwitsch: Philharmonia Orchestra conducted by Sir Malcolm Sargent; Victor). One of the new, low-priced "Bluebird Classics." Victor's answer to the increasingly successful cut-rate labels. There are no program notes, but the performance is excellent, and there is little sacrifice in the quality of recorded sound.

Busoni: Sonata No. 2 (Richard Burgin, violin; Edward Weiss, piano; Circle). A massive and powerful work that seems younger than its 53 years. It is free of the flowery passage work of Busoni's famous piano transcriptions, but never dissonant in the modern sense. It is excellently performed by the Boston Symphony's concertmaster and a pupil of the composer.

Dancers of Bali Gamelan Orchestra (Columbia). Deep gongs, cymbals, gangsas (marimbas), reyongs (small tuned gongs), angklungs (rattles) and fingerdrums, played with astonishing variety of tone and precisely stumbling rhythms by the Indonesian musicians now touring the U.S. (TIME. Oct. 6). Good fun. and a rat-tling good test for "hi-fi" phonographs. Mozart: Sonata in B Flat, K, 570

(Ralph Kirkpatrick, pianist; Bartok), A virtuoso performance on a reconstructed 18th century piano, Kirkpatrick coaxes fine-grained inflections out of the instrument's wiry pianissimos, makes its loud notes sound almost like those of a solid modern piano.

Poulenc: Les Biches (Paris Conservatory Orchestra conducted by Roger Désormière: London). Impudent musical commentary on Pamour, composed for a ballet by one of France's gavest composers. Superbly played

Anna Russell Sings? (Columbia). A woman's-club-type lecture-recital on how to be a concert singer that is sometimes too true to be funny. Examples include a noisy aria for singers with "resonance where the brains ought to be," art songs for singers with "artistry but no voice." modern music for tone-deaf singers ("the more off-key, the more contemporary" Schubert-Weingartner: Symphony in

E (Vienna State Opera Orchestra conducted by Franz Litschauer; Vanguard). One of the composer's three uncompleted symphonies. This one was left fully sketched but not orchestrated, is called No. 7 by some reliable musicologists. It has a beautiful slow movement; all of it is good Schubert.

# MEET THE WORLD'S SMARTEST COUPLE

Yuletide problems fail to foil
The Kenneth P. McGuires
Their Christmas greetings one and all,
Go fast and safe—as Wires!

(There's no nicer, more impressive way to say "Merry Christmas" to personal and business friends than b) Western Union Telegram, in special boiladay ewelope. The next best thing to being there!)

Youngsters on their list? You bet!
And we can guarantee
They'll have the Merriest Christmas yet,
With thanks to Kenneth P.

(Santagrams, datelined North Pole and signed by Santa himself, are a special shrill for any child)

A welcome gift, indeed, is Cash
For folks to get and spend it.
The Ken McGuires play it smart—
Let Western Union send it!

(You can send
Western Union
Telegraphic Gift
Money Orders right
up to Christmas Day!
Delivered on beautiful
stacial blanch!

No crowded aisle, no milling throng, Makes Kenneth's helpmeet nervous She uses Western Union's quick And easy Shopping Service!

(Western Union will buy the gifts you select . . . and have them delivered anywhere gift-wrapped—with your message)

There are so many

ways to say

"Merry Christmas"

Good business friends in flocks will get Warm Cheer from Kenneth—he Sends Telegrams to wish those boys "A Prosp'rous Fifty-Three!"

(Just give your New Year's message and list of names and addresses—Western Union will do the rest!)

with the help of

WESTERN UNION

# RADIO & TV

## Network Debut

Gordon Campbell Kerr, 5 lbs. 7 oz., made his debut into the world last week at Denver's Colorado General Hospital, and instantly became a TV performer on a 40-station NBC network, courtesy of Smith, Kline and French, manufacturers of pharmaceuticals. Though physicians gathered at A.M.A. meetings had previously watched childbirth over closed-circuit hookups (TIME, June 25, 1951), this was the first time that a delivery had been telecast for the general public.

Because normal childbirth cannot be scheduled for any given hour, the A.M.A. and the commercial sponsors chose a Caesarean delivery for last week's program. Mrs. John Kerr, 38, wife of a sergeant stationed at Fitzsimons General Hospital, had had two babies already, both by Caesarean section. It was easy for her doctors to set the day and hour when they would

perform the third for TV.

While Sergeant Kerr chain-smoked and watched nervously on a TV set in the hospital basement, the cameras showed his wife Lillian on the operating table, virtually obscured by doctors and nurses in close-order formation. There was a short explanation of what was going to happen and the fetal heartheat pounded over the air. Then the cameras switched to the hospital's up-to-the-minute facilities for care of premature babies. Only the TV crew and newsmen saw the actual incision in Mrs. Kerr's abdomen and the quick, dramatic extraction of the full-term baby The TV audience was cut in again just in time to see Gordon, already swabbed down, get his umbilical cord tied, his mouth drained of mucus and drops put in his eyes. Gordon's response: a lusty wail. For her pains, Mrs. Kerr got a \$100 de-

# They wish you a Very Merry Christmas!

They want your brand of merchandise and they're in the mood to buy. What finer Season's Greeting could you ask than the good wishes of your customers -expressed in terms of purchases?

#### Facts Come First

To earn good wishes and to translate them into sales, you must first make certain that buyers are well informed about your brand. They must have all the facts; they must understand the benefits they can derive from each major and minor advantage that you offer.

Facts can be most effectively presented in print by means of attractive booklets, brochures, broadsides, catalogs and other types of well-printed selling literature.

# Your Ally - A Good Printer

The quickest, easiest and most economical way to get your story in print is to discuss your plans with a good printer before you work out the details. A printer can serve you best when he is called in early and permitted to work hand in hand with your people

To deliver the best possible job, your printer will probably specify Warren's Standard Printing Papers for your work. He knows and respects Warren's ability to furnish fine grades of paper that produce superior printing results time after time. S. D. Warren Company, 89 Broad Street, Boston 1, Massachusetts,

# Trouble for the Workers

Manhattan's Communist Daily Worker has been in financial trouble for so long that even its most devoted readers vawn at the cries for help. But last week the cry of "wolf" had a convincing ring to it. Said a boldface box covering Page One: "We are at the end of all resources. Our printers' bill has piled up, and he cannot go without payment . . . We must receive at least \$5,000 in the next few days if we are to be able to continue, and \$10,000 by the end of next week. We ask that every reader-and we mean every reader-immediately send from five to ten dollars." The Worker could expect no help from its blood brother across the Atlantic, the London Daily Worker, For months it, too, has been appealing for money on Page One, may have to slim down to a single page, or fold altogether.

# The Great Transformation

The New York Daily News, which covers sexy, sensational stories with a flair that no other tabloid can match, last week broke a story that surprised even hardened News readers. Splashed across Page One was a banner headline: EX-G.L. BECOMES BLONDE BEAUTY. Said the story: "A Bronx youth, who served two years in the Army during the war and was honorably discharged, has been transformed by the wizardry of medical science into a beautiful woman." Under the banner were pictures of George W. Jorgensen. 26. the George who "is no more," and Christine, "the new woman" he became after "five major operations, a minor operation and almost 2,000 [hormone] injections" in a Copenhagen hospital.

The paper was tipped to its exclusive by a letter that News Reporter Ben White received from a friend who is a laboratory technician in Copenhagen, White tracked down the parents of George and or Christine in New York City, talked them into giving him the full story, together with pictures of Christine in a low-cut dress and a letter from her breaking the news to the folks at home. Wrote she: "I am still the same old Brud, but my dears, nature made a mistake, which I have had corrected and now I am your daughter. Wire services and other papers pounced on the News exclusive, phoned Copenhagen directly and sent dozens of correspondents converging on Christine's room in the hospital, where she is awaiting a final operation.

Needlework or Ball Gomes. "Lying in a hospital bed," said an A.P. dispatch from Copenhagen. "her long yellow hair curling on a pillow, shel widened her grey-blue eyes and lifted her hands in a surprised, frightened gesture." One newsman got into her hospital room using a

Pop said "he" . . .

houquet of flowers as a pass key. Othersbombarded her with such questions as "Do you sleep in a nightgown or pajamas?" "Will you ever be a mother?" "Do you still have to shave?" "Are your interests male or female? I mean are you interested in, say, needlework, rather than a ball game?"

a dati game:

The Near added its own fillip from its correspondent in Copenhagen who cabled; "Chris now is a girl I could have fallen in love with had I met her under different circumstances." At Bentwaters Air Force Base in England, reporters found a U.S. Air Force sergeant who said he had dated

CHRISTINE ... when he meant "she."

TIME, DECEMBER 15, 1952

Christine six months ago. When they asked him for details, he obligingly observed: "She's got a personality that's hard to beat, and the best body of any girl I ever met." Many an editor and reporter found himself in the same fix as father Jorgensen, who blurred out amidst all the uprax: "This business is very confusing. I'll he in the middle of a conversation and I'll asy he when I mean 'she."

Expert Opinion. After the first flush of excitement wore off, papers turned to doctors for expert opinion on the case. They pooh-poohed the story as anything new, pointing out that sex transformation is far from a medical rarity, that there are similar cases in hospitals all over the U.S. right now. Nevertheless, papers ran semilearned stories sprinkled with such terms as hermaphrodite and pseudohermaphrodite (see MEDICINE), and reporters manfully tried to translate the medicalese into journalese. Said the New York World-Telegram and Sun: "Once the internal situation is known, plastic surgery can be used to build up or play down the [external] characteristics that correspond or do not correspond respectively with the organs found inside."

By week's end, the Jorgensen family, which had seemed reluctant to be pushed into the spotlight, was fast learning the sweet uses of publicity. Christine's parents announced that they would sell Christine's life story for \$30,000 "in order to help others" who need similar treatment. On her part, Christine, who had protested the blizzard of Page One publicity, also made a discovery. She had been "shooting a little 16-mm, color travel film on Denmark . . . not a bad little movie." She had never really thought about it before, but now. Christine said, widening her grey-blue eyes, she was afraid that all the publicity in the newspapers might spoil her plans to "take it back to the States and perhaps tour the country, showing it in schools, small towns and places like that, and giving lectures."

PIONEER IN THE ART OF BLENDING SCOTCH WHISKY

Africa's 0,000.000 Negro and colored population. In South Africa, torn by racial strife, Drum's popularity is easily explained, "We air the views and grievances of the blacks," says Publisher James R. Bailey, a white man, "and make them feel that Communism isn't the solution to their problems."

A spotlight on the problems created by poverty, unemployment, disease, crime, and a fanatic white-supremacist government is not all that Drum gives the 65,000 readers who buy it every month. Its some 40 illustrated pages serve up a blend of Negro and colored (i.e., mixed blood) life. sports, society, sex, scandal and politics that South Africa's non-whites can get in no other magazine. It was started by Publisher Bailey. 33, an ex-R.A.F. combat pilot, who settled down to raise sheep and breed horses after the war. As editor, Bailey picked a white South African friend, Anthony Sampson, 26, whom he had known at Oxford where they had often discussed South Africa's race problem. Drum is staffed largely by non-white

Wired & Whippad, Both Bailey and Sampson faced opposition from the Malain government, whose nightmare is "whites drowning in a black sea." The government threatened to choke off Drum's paper supply for such things as printing pictures of Eleanor Roosevelt shaking hands with a Neuro, Police have also taken to shadowing Drum staffers, checking on where they go and whom they see. Despite the threats, Drum has made its mark with a series of spectacular exposés.

Its first came after it investigated the vast plate and corn farms 100 miles east of Johannesburg, where convicts and contact laborers were hired by white farmers. The farmers had been accused of fierce brutality, but had been cleared by the Malan government. Drum dressed one of its staffers in rags, got him on to the farms, later slipped in a photographer.

They found that many workers were imprisoned behind barbed wire, slept at night on concrete slabs and were treated like galley slaves. Mounted "boss boys" rode among them during the day, beating them with bullwhips. Laborers died in filthy "hospitals" where a doctor was seldom seen. Often workers did not see the contracts they supposedly had "signed." had no idea what was in them.

When Drium published its illustrated exposit (see e.g.), it touched of a roar of protest round the world. The British government of the respected South African Institute of Race Relations confirmed Drium's charges with its own survey. The protests forced the reflectant government to make some continuous continuous confirmed to the respected South African Institute of the relationship of the respective forces of the relation of the respective forces and the relation of the respective forces and the relation of the respective forces and the respective forces a

readers: they could not believe that any agazine backed by whites was up to any good. Drim is still occasionally criticized by readers. Once when it charged that some which doctors were encouraging tribal ritual murder; the editors had to placate a delegation of seven witch doctors who went to Drum's celitorial office in full raiment to protest strongly the "slur on a noble profession and processing the strong that the processing the strong the strong that the processing the strong that th

Drim has never overcome the government's hostility, but it long ago conquered the suspicions of its Negro and colored readers. It is also regarded with approval by many anti-Malan whites in South Africa. Summed up one white: "Drum makes South Africa's segregated, despised nonwhites feel like people."

"Boss Boy" on South African Farm The barbed wire was exposed.

# Wake up to Colorful Living!

Color is not just coming into the home—it has arrived! And one of the major factors stimulating the use of color is rayon.

Rayon's affinity for dves results in colors of new depth and brilliance . . . exquisite colors of long life and faderesistance . . . colors to make more rooms more beautiful.

Now, because of rayon, all of our homes can afford this colorful luxury. For rayon, wonderfully low-priced to begin with, brings lastingness to loveliness. And it does this in every textile field that helps to furnish our homes.

The luxurious bedspread above is just one example of the glamour rayon brings to this type of product.

Most versatile of fibers, rayon can be engineered to provide any desired result—soft bulk as in blankets, sat iny smoothness as in draperies, rugged wear as in car pets. It has made possible completely new styling, new textures, as well as new colors.

That's why so many who really know, refer to rayon as the wonder fiber of all time! American Viscose Corporation, 350 Fifth Avenue, New York I, N. Y.

# MAKES AN OYSTER CLAM UP

Oyster are creatures of habit. Twice each day they open their shells to feed, whether in the water or packed in barrels for market. Naturally, this instinctive action affects their freshness, as some of their essential juices escape each time they try to feed in transit.

Preserving the freshness of oysters created a problem for oystermen until Hewitt-Robins found the answer in a foundry. By using a Hewitt-Robins Foundry Shakeout, the oysters are packed in barrels so firmly they cannot open. Packing time is reduced to three bushels per barrel in only 5 seconds. Shellfish and foundry castings have nothing in common, yet both are efficiently handled on a Hewitt-Robins-Foundry Shakeout. By a simple adjustment of the stroke, this versatile unit can knock out cement-bonded cores from 4-ton castings in minutes, or firm by pack oysters without cracking a shell.

Whether your problem involves conveying, shaking or screening bulk materials. Hewitt-Robins has the answer. We have long pioneered in better methods and equipment to handle and process solids, liquids and gases in bulk for every industrial need.

Hewitt-Robins Foundry Shakeouts shake the flask, not the foundry. Live frame and load ride on soft, heavy-duty coll springs ... springs that have stood up for over ten years on units handling 35 tomor more.

# EDUCATION

# Habits of Vigor

Francis Olmsted Grubbs, fresh from Princeton University, got off to a bad start when he began teaching French at the Leomis School in Windser, Conn. At the Leomis School in Windser, Conn. At a wastebasket and fell flat on his face. Later, the bogs, with typical irreverence, began calling him "Fog." But as things turned out. Francis Grubbs soon gave the lie to his nickname. Last week, and school's beaddmaster, where the search of the connection schools beaddmaster.

He thus automatically became one of

HEADMASTER GRUBBS
We don't pass the buck."

the East's most important secondary schoolmen, for Loomis occupies a secure place among the nation's top dozen prep schools. It began in 1912, with \$2,170,ooo left by five childless members of a wealthy Windsor family named Loomis, who wanted to found a place for students of all races and religions-"that some good may come to posterity from the harvest, poor though it may be, of our lives, Under the first headmaster, Nathaniel Batchelder, the good came quickly. He boosted enrollments from 67 to 320, built a \$1,500,000 campus, saw his endowment grow to over \$3,000,000, Over the years, Loomis began to get a goodly share of scions-the sons of John D. Rockefeller Jr., Lee Higginson, Gerard Swope and Arthur Hays Sulzberger,

An earnest Batchelder disciple. Grubbs means to keep Loomis as it is—from its comparatively low price lag (\$1,375 for boarders. \$250 for day students) to its policy of making every boy, rich or poor, wait on table and clean his own room. The whole idea, asys Grubbs, its to turn out boys who will be ready to "stand up and be counted. We don't pass the buck

to the colleges. It is our role to bring boys to the highest degree of maturity possible." All this is just what the Loomis founders wanted—"to train boys to habits of vigor and self-reliance and [to use] every means to attain this end."

## Rumblings in Israel

The man on the Jeruslem bus would have had no objection to the two little girls in front of him, except for the fact that they were wearing their blue-and-white school uniforms. That meant that they were students at the Catholic Ecole de Secours de Saint Joseph, and the man could not help exploding. "You are very wicked." he said to the girls. "very wicked for going to a Christian school."

The man was not alone last week in thinking so. Though the number of Israeli children attending the 30-oodd Catholic and Protestant mission schools is still small, it is increasing. Last year there were 1,000; this year there are 1,500. Next year there will probably be even more from Israel's 300-000 youngsters.

The reason for the trend is not religious. The fact is that some Israeli parents are fed up with the condition of the public schools. First of all, they are divided into ideological categories-labor. religious and general. Even first-graders are organized into special youth groups sponsored by the various political parties. More important, many schools are hopelessly overcrowded, with some operating on three shifts. Many cannot serve the hot meals that the mission schools do; nor can all of them afford bus transportation or supervised play. Far from being free, high-school tuitions are some 75% higher than in the Christian schools,

So far, the government has refused to take any action, but each day the grumblings of the nationalists grow louder. Cried Herut, official organ of the extreme right-wing Freedom Party: "The souls of these children [in mission schools] are being systematically destroyed. The future of the nation is in danger."

# The Hanging Judge

From any other hoy of ten, the letter might have sounded fantastic, but not from young John Acton. "I am a perfect linguist." he wrote his mother one day in 1844. "Knowing perfectly. English, French, German, and can almost speak Latin. I can speake a few words of Chinese, Greek, Italian, Spanish, and Irish. I also know Chemistry, Astronomy, Mechanics, and many other sciences, but do not know botany. ... I am in a hurry, therefore good-type."

As he grew older, Lord Acton was still in a hurry to know more. As a courtly, bearded scholar, he eventually won the reputation of being the most erudite man in England and one of its most impressive historians. But for all his learning. Acton never published a book in his own lifetime; and for all its brilliance, his rigidly ethical philosophy seemed out of step

with the complacent new materialism of his age, "I am," he once wrote," absolutely alone in my essential ethical position . . . I never had any contemporaries.

Last week, with the publication of two biographical studies-Acton's Political G. E. Fasnacht (Hollis & Carter; 215.). and Lord Acton: A Study in Conscience and Politics, by U.S. Historian Gertrude Himmelfarb (University of Chicago: the Atlantic could review Acton's position. Some would find him no longer out of step, "He is of this age, more than of his," says Biographer Himmelfarb, "He is indeed, one of our great contemporaries.

Two Books a Day. Even without his vast knowledge. Acton might have become a famous man. One of his grandfathers was a Roman Catholic baronet who won the favor of the Queen of Naples

HISTORIAN ACTON "To know and to love God . . . "

and became her Prime Minister. His maternal grandfather was a duke of the Holy Roman Empire who won the favor of Talleyrand and became a peer of France. To all this, Acton's stepfather added another note: he was Lord Granville, one of

the most influential of Britain's Whigs. With such a background, young Acton was destined to have a curious education. He studied with Catholic scholars in France, England and Germany, and by the time he finished, he had delved deep into every aspect of history. He could read and all but memorize two books a day. He was said to have known everyone worth knowing and to have read everything worth reading. He was a familiar figure in the great Whig houses at Windsor Castle and the papal court. He spoke English to his children, German to his wife, French to his sister-in-law, and Italian to his mother-in-law. But in none of these places and languages was Acton fully at home. His story, he said, was "the story of a man

CHICAGO, MILWAUKEE, ST. PAUL AND PACIFIC RAILROAD

who started in life . . . a sincere Catholic and a sincere Liberal; who therefore renounced everything in Catholicism which was not compatible with Liberty, and everything in Politics that was not compatible with Catholicity."

As a Catholic he harely escaped excommunication for his stubborn stand against Flus IX's pronouncement of the doctrine of papal infallibility. As a Liberal the served in Parliament for six years, he was a failure. For he loathed makine, either speeches or compromises "HI I could only set 'turned out of Parliament in an oldes".). It was not until 180c. when he was made reguls professor of modern history at Cambridge University, that he found his proper niche. There he finally revealed his

"What We Ought." To Acton, there was one constant in history: the idea of liberty. But this liberty involved far more than the rights of man or the pursuit of happiness, included: said Acton. "If happiness is the end of Society, then liberty is superfluous. . Liberty is not the power of doing what we like, but the right of being able to do what we ought."

Every age, said Acton, had witnessed man's struggle for freedom, but man would never find it within social or political frameworks, alone. Athenian liberty failed, for instance, because it belonged "toa nage which possessed no fixed standard of right and wrone," and modern democracies would also fail if they insisted that "the will of man, and the will of God, was the rule of life." True political free-another principle—"the principle that all political authorities must be tested and reformed according to a code which was not made by man."

Tablets of Eternity. The historian's function, under this definition, is to do more than study facts for their own sake, for "universal history is a continuous development; it is not a burden on the memory but an illumination of the soul. A slavish objectivity subverts the purpose of history: a historian must not only be a judge. but a "hanging judge" as well. "The inflexible integrity of the moral code, said Acton, "is, to me, the secret of the authority, the dignity, the utility of history . . . Opinions alter, manners change, creeds rise and fall, but the moral law is written on the tablets of eternity. Perhaps. Acton admitted, man would

never find this moral law, but should he ever cease trying, all true progress would cease, too. Progress is nothing less than the "striving to know and to love God," and the human conscience is nothing less than God's "ambassador," The study of history, therefore, is essentially the study of conscience, "The weight of opinion is against me," cried Acton to his students. "when I exhort you never to debase the moral currency or to lower the standard of rectitude, but to try others by the final maxim that governs your own lives, and to suffer no man and no cause to escape the undying penalty which history has the power to inflict on wrong,"

Precious to Give Precious to Receive

MAC NAUGHTON'S CANADIAN

Over the river, and through the wood,
To grandfather's house we go;
The horse knows the way,
To carry the sleigh.
Through the white and drifted snow.

—Lydia Maria Child

# Through the wood to Grandfather's house

Once upon a time, when an orange was something you found once a year in a stocking "hung by the chimney with care," you only saw your relatives on certain fixed great occasions. Christmas Day was such a time, at the start of the century. Mother stuck her long, hatpin through her brown toque with the pink velvet roses; Fahrer wore his stickpin and gold watch-fold.

Only the very youngest dared wiggle while Grandpa, solemn in his whiskers, said a long, thorough libesing before he carved. So you sat primly, hands in lap, smelling the turkey-dressing sharp with sage, and hoping for the wishbone. You ate plum pudding until they stopped you.

After Ginner, you had to keep quiet. The groaning adults lay spraddled about, dozing on the horsehair-stuffed furniture. So you looked at stereoscope pictures of Niagara Falls, or watched the tiny snowstorm in the crystal ball.

Or, the very best of all, you set up the cardboard soldiers in serried ranks for a popgun war. The bearded Russian soldiers all looked like the Czar, and the American soldiers were Rough Riders like Teddy Roosevett—and you lost the cork somewhere under Unlet Charley. You had a fine time—a few times a year. Travel was just too difficult. You had to get up in the dark and take a streetear ride to the railroad station and then spend hours on a train before you were met by sleigh or buggy at the other end. A day's fun meant heavy expense and long preparations and hard work; life had not yet been revolutionized by Henry Ford.

For the first men of motors were great liberators. They freed men and women from the drougery and the tedium and the isolation of Victorian living; their revolution made modern living possible. The little fragile handmade model that Henry Ford steered over Detroit streets had the toughness of a great idea—and the idea came to be a way of life for our time.

That way is the American Road—a road that is physically more than three million miles long, in terms of actual highway mileage. In terms of the change in our lives it is beyond measurement.

The American Road is a highway without an end, but it is something more than macadam; it is a path toward peace and progress and a better life for men and women everywhere. Ford Motor Company believes in the American Road.

### Ford Motor Company

FORD · LINCOLN · MERCURY CARS · FORD TRUCKS AND TRACTORS

Today, the automobile makes the family reunion convenient; people measure distance in minutes, not miles.

Because it brings brightness to young eyes and laughter to young hearts.

- ... it gives pleasure to those who receive, and joy to those fortunate enough to give.
- ... it brings home closer to those far away.
- ...it comes as a happy benediction to ... we trust ... a well-lived year.
- ... it retells the Greatest Story Ever Told.

Thanks for Christmas.

#### THE THEATER

#### New Plays in Manhattan

I've Got Siapence (by John van Drutein) is well intended and very ill contrived. The author of The Viore of the Turtle is frankly preaching man's need for some kind of faith. But in the very act of bringing the light, the dramatist in van Druten himself has lost his way. Pwe Got Sixpence is never persuasive and only fitfully lively.

As in The Voice of the Turtle, the play introduces two kinds of modern grid. One Vicki Cummings), worldly and anxious for security and comfort, sances a conventionally religious Roman Catholic; which was considered to the series of the series and independent-minded, rabbes into an intense love affair with a bitter, harshly unsentimental young writer who, when she becomes pergand, refuses to marry her. She, on the brink of despire, returns to her on the brink of despir, returns to her on the brink of despir, returns to her on the

Against such somber lovers, the play sets a rich del blind lady who finds happiness in the teachings of a jolly, measy apostle of The All-Effulgent. Very possibly these two, like Elioit's silly "assistants" in The Cocktail Party, symbolize a serenity unknown to prideful intellectuals; but they are easier figures to envy than emulate. In any case, the young couple themselves seem less to acquire the final curtain has less of a spiritual air than the customary romantic on.

Inadequate though it is, the straight preaching in I've Got Sixpence merits greater respect than the more entertaining episodes where Playwright van Druten strives to be both high-minded and highspirited. Where Eliot's cocktail-party frivolities have real emblematic force, much that is entertaining in I've Got Sixpence goes out too directly for laughs. In an extremely serious scene where the writer describes how his publishers have turned down his manuscript, he intrudes such a pure theatrical gag as: "They said it was very well typed"; and for no reason except that it is always surefire with the gallery, there is an incidental crack about Gertrude Stein.

See the Jaguar (by N. Richard Nash) seethed with action, pulsed with meaning, and added up to nothing. Closing at week's end, it told a melodramatic movie varn that-loaded down with symbolism -made a lumbering stagecoach. The yarn, laid in mountain country, concerned a crusading young schoolmaster's struggle against the local villain who tyrannized over people, gobbled up property, caged up animals. Crux of the struggle was a hunt for an unworldly youth fleeing with a \$900 inheritance. As a western. Jaguar lacked life because even its gunplay suggested a morality play. As serious drama. it was so portentous that every little movement had three meanings of its own.

#### SCIENCE

#### First Decade

In a squash court below the west stands of Stagg Field at the University of Chicago, 42 scientists stared intently at a strange pile of graphite bricks. The time was 0:45 on a morning just ten years ago. Italian-born Nobel Laureate Enrico Fermi gave the signal for the experiment to begin. A cadmium control rod was slowly drawn from position. Geiger counters clicked, Control lights flashed. The pen in an automatic recording device moved over graph paper in a rising curve. At 3:45 Dr. Fermi calmly announced: "The reaction is self-sustaining: the curve is exponential. A chain reaction had been achieved and the first decade of atomic energy had begun.

Last week, in the same squash court, surviving members of the early group of experimenters gathered to celebrate their success. Said their former director, Dr. Arthur Holly Compton, now chancellor of Washington University: "We who had the might of the atomic nucleus in our hands would have been tratiors to mankind had we refused to build bombs and use them with tempered blows,"

#### "Monstrous Beaste"

The strange animal that Explorer Vicente Yáñes Finism brought home from the new world in 1500 astonished the Spanish court. Their Majestes Ferdinand and Isabella ran their rayal fingers through the soft-furned pouch on the beast's belly and marveled at such a freak of nature. In that age of exaggerations, the little cat-steed creature grew into welrd shapes in the minds of men. To the Venetian court when the strength of the st

Through the years, even the name went through strange evolutions. Simils Vlajpina (fox-monkey), after Martyr's description, turned out to be the Boscherio of Dutch explorers, the rat de bois of Louisiania's French trappers, didelphys in the classic zoology of Linnaeus and finally the modern opessum. This is the Indian name as recorded by Captain John Smith at Jamestown. But even Smith was wrong, said the King's surveyor in Carollan. As was wrong, said the King's surveyor in Carollan. The bennet the prossum.

Dim and Dull. Mystery and myth have surrounded the home life and sex habits of the possum through four centuries. Now, in a new book called Possum (University of Texas Press; \$6). complete with elaborate recipes for possum and 'taters, Dr. Carl G. Hartman, "pioneer possum embryologist and accoucheur,' tells all.

The American marsupial, says Dr. Hartman, is a congenital moron. In its tiny skull there is room for only a meager brain. Fertility, not intelligence, is the reason for its survival. Its popping, jetblack eyes are all pupil and ought to be sharp at night, but even in daylight they are dim and dull. Only its hearing is keen (its thin ears curl over to keep out insects during sleep), and its bristling whiskers have a superine sense of touch. On his bort legs, the possum meanders in a slow, aimless shuffle. As a climber he shows his bort legs, the possum meanders in a slow, aimless shuffle. As a climber he shows his preatest skill, using his strong, ratilize tail and the opposing "thumb" on his hind feet to scrabble after auturn persimmons. He cannot hang by his tail as long as degend would have it, but he does "play

Possum in the Pouch
A congenital moron.

possum" with stubborn persistence when in danger.

Marsupial Secrets. The female possum's habit of licking her pouch before giving birth is the source of what Dr. Hartman considers several preposterous possum legends. But for all its stupidity, the possum, in its sex life, is much like other mammals. After only 12½ days' gestation, the mother props herself into a sitting position and delivers a large litter of tiny (20 can fit into a teaspoon), wormlike young. Still little more than squirming, pink embryos, the baby possums clamber upward over their mother's soft, warm underbelly and into the pouch that opens and closes like an old-fashioned tobacco sack. There they fasten themselves to one of 13 pinhead teats and are nourished for two months while they grow to the size of young rats. Outside the pouch, they are carried about clinging to their mother's fur and hair.

All this prying into marsupial secrets, says Dr. Hartman, is more than idle curiosity or an effort to explain away old folk-lore. In the possum's pouch, science can study living embryos outside the womb. Thus, from the thick-witted possum, man may learn some lessons on how to care for his own premature young.

#### The Jeweled Corpse

The secret room in the bowels of the pramidal "Temple of Inscriptions" at Falenque is probably "the most sumpture on sometime, chamber in the western hemisphere. The six skeletons which like the secret summer of the secret secret summer (Trus. July 7) had almost surely been offered up to an ancient Indian deity, But Dr. Rus had a hunch that the sacrificial stone, encrusted with Mayan hieroglyphics might be more than a great attar. Before he could investigate further, money can out and the rains

Last month, the rainy season over. Dr. Ruz got a grant from Mexico's retiring President Miguel Alemán, and hurried back to the Isthmus of Tehuantepec.where he pitched camp in the jungle near Palenque. With Assistant César Sáenz he descended the 50 steps to the altar room. Carefully the diggers drilled a hole in the side of the stone block. As Dr. Ruz sus-pected, it was hollow. Next morning the men came back with truck jacks, wedged them under the protruding edges of the slab that topped the altar. All day and all night they worked at the jacks. By morning they had raised the slab some two feet, only to find another lid fitted flush in the top of the block. With crowbar and ropes, they managed to lift the second lid. In the red-painted cavity below lay the

all but pulverized skeleton of a middleseed man. His fine cloth rainent was in tatters, but his burial jewelry made as rich a display as it had when he was interred 13 centuries ago. A jade diadem covered his skull, and chunly jade earrings lay where his ears had been. A jade mask with inlaid month was a jade bead, and a long jade necklace hung over a beaded breasthate.

At his crumbling collarbone he wore a pearl as large as a walnut. His right hand held a large jade cube, his left a jade sphere. Jade ornaments stood by his feet, and nearby were two jade idols. Popeved and sporting neat goatees, the idols looked like Mayan sun gods. Dr. Ruz's hunch had paid off.

The corpse in the crypt had surely once been some exalted leader of Palenque civilization. The hieroglyphics on the stone sarcophagus alone, estimated Dr. Ruz, had been 25 years in the carving. The original owners of the six skeletons outside had been sacrificed to guard the tomb.

For all its similarity to the opulent tombs of the Pharaohs, Dr. Ruz sees no Egyptian influence in his Mayan find. The coincidental resemblance, he says, proves only that wherever man has lived, human culture has followed similar patterns.

In Egypt. meanwhile, diggers at Sakkara uncovered a \_,000-year-old (omb from the Sixth Dynasty, There, only bright, well-preserved wall paintings still proclaim the baggage that the dead king kept to use at his resurrection. Unlike Mayan monarchs. Pharaohs of that age were too poor for jeweled funerals.

#### PERSONALITY

THE name of Dr. Alfred C. Kinsey is a household word. To those who do not know him, it stands for sex with a capital S. with special emphasis on sexual aberrations. To those who do know him, it stands for a quiet, \$8-year-old academician who takes the same kind of interest in sex as he does in gall wasps, About gall wasps, Dr. Kinsey knows just about all there is to

know. About sex, he probably knows more than any other man alive, and he has built up one of the greatest collections of crotica ever assembled. Yet he is an almost monotonously normal human being,

While he was still a boy, Kinsey wrote his first published paper, based on his observation of what various birds did in the rain. Some birds, he noted, sang, some shut up, some flew for shelter, some danced in the sky. This early

ornithology foreshadowed the two main drives of his life-love of nature and passion for explicit details.

While he was still at Harvard, he began his enormously erudite, monumental work on the gall wasp, a tiny insect of which some 3,000 species exist. Kinsey traveled 80,000 miles collecting gall wasps, and he measured, catalogued and preserved 3,500,coo specimens to demonstrate their individual variations. Under a microscope. he took and recorded 28 different measurements on each wasp.

Kinsey joined the staff of Indiana University, where he still works, in 1020, and rose slowly in the academic hierarchy. He might still be an obscure professor of zoology had not twelve teachers, of whom he was one, joined together in the '30s to give "Marriage Course." Students asked Kinsey about sex, and he was shocked to discover how little was known scientifically about the sexual behavior of human beings. Before this, he seems to have had no particular interest in the subject. But once he

got started, it was the gall wasp all over again. When he began his research, some of his scientific colleagues (and their wives) cut him dead, and the period of semi-ostracism left him some-

what touchy and thin-skinned,

Kinsey is a solidly built man with greving, buff-colored hair in a short pompadour, eyes that vary between blue and hazel, and a sensitive, rather tense mouth above a hard jaw. His wife, whom he calls "Mac," was a graduate student of chemistry, and has been a great help. Being scientifically trained, she raised no objection at all when he started his work on sex, and sometimes she helps him in the office typing confidential documents. She teaches classes in swimming, runs the local Girl Scout camp, and loves the great outdoors.

STRANGER joining the Kinseys and staff on one of their A STRANGER joining the Kinseys and sale of picnics would never suspect that these nice, comfortable faculty folks were engaged in studies any more stimulating than the use of the comma in Chaucer. Visitors are exposed to the same paradox in Kinsey's plant, which is called the Institute of Sex Research. Inc. The atmosphere is one of surgical asepsis, and each room is as clean and functional as the inside of a clock, Doors are heavy, made of a three-ply, sound-proof material, and they have substantial locks. Kinsey carries numerous keys, and his progress from room to room, cabinet to cabinet, or file to file, is slow, because each has to be unlocked carefully. In Kinsey's own office, no single piece of paper is ever in evidence unless he is working on it. But the material he may be inspecting or cataloguing would stand an ordinary layman's hair on end -elaborate, erotic instruments and devices from Japan, wildly obscene picture books. Austrian etchings and plaster models that would make a call girl blush.

Kinsey and his men have taken 16,500 case histories so far. The core of the work is interviewing. The records are preserved on 400,000 punched I.B.M. cards, which are guarded like the gold at Fort Knox. All the recording is done in a code Kinsey invented, which is so abstruse that a professional cryptographer was unable to break it. The code has never been written down and takes about a year to memorize; Kinsey and his three chief associates are the only people alive who know it.

THE conduct of an interview is, understandably, a ticklish business. After years in which he never smoked or drank. Kinsey deliberately took up tobacco and alcohol in a gingerly fashion, because he thought that if he smoked and drank moderately with people whose sexual histories he was exploring, it would produce a better rapport. The system seems to work. Nobody who has given his case history to Kinsey is likely to forget the experience. His own family has contributed; he took his daughter Joan's sex history when she was in high school. and after she married, her husband offered his to his father-in-

law. The questioning may take from 11 to 34 hours, and penetrates every aspect of the subject's sexual life, including details that seem utterly outlandish even to highly

Once, in Peoria, Kinsey was interviewing a 350-lb. Negro prostitute. "Suh." she told him, "you makes me 'member things I never even knew happened to me!"

The reaction to Kinsey's gall-wasp approach to sex has been mixed, to say the least. His statistic-crammed. 804page book. Sexual Behavior in the Human Male (TIME, Jan. 5, 1948), was published by a medical publishing house (W. B. Saunders Co.) and cost \$6.50, but it shot up on the bestseller list with the aid of free publicity and loud denunciations. The weightiest denunciations came from religious and moral leaders, who pointed out that Kinsey's examination of men's sex life altogether denied the existence of any moral factor whatever in sexual relations: Kinsey regarded man merely as an animal of extremely versatile sexuality, whose sexual aberrations were not aberrations at

all because there was no sexual norm-much less morality or responsibility. It was all very well, they said, to catalogue behavior in the interests of science, but to make the catalogue available to the lay public was to undermine the individual's sense of right & wrong. Other Kinsey critics challenged the soundness of his sampling methods. Last summer the National Research Council (which supplies a slice of Kinsey's research funds) completed an investigation of this charge and found no reason to withdraw its support.

INSEY'S house in Bloomington, Ind., in which he and his K INSEY'S house in Bloomington, inc., in which their three children grew up, is a red brick structure designed by himself on a green, sunny street a few blocks from the campus. There are 170 different kinds of trees and shrubs on the 23-acre property. most of which Kinsey planted himself. Kinsey gets to his Institute at about 9 in the morning, seven days a week, and works (with a brief lunch period) till about 6. He goes home for dinner, plays some music, pokes around in the garden, and returns to the Institute at 7:30, working there till 11 or midnight. On Sunday evening, which is devoted to music, he does not go back to the office, and exactly once a year, on Christmas. he takes the whole day off. He has not had a vacation in 13 years.

Though Sexual Behavior in the Human Male sold 275,000 copies, and would have earned him a considerable fortune, he has never taken a cent of royalties. All the proceeds are plowed back into the research, and this will be the procedure

with future books.

Dr KINSEY

Eight or nine Kinsey books are planned in all-the next one to deal with the sexual behavior of women. Awaited expectantly for at least a year, it has been delayed, partly because women's sex habits proved far harder to tabulate than men's. "It's double the work," says Dr. Kinsey.

#### Still There

Howling gales whipped rocks around like basehalis. The numbing cold, 22° be-low zero, made even the simplest movement a major undertaking. The Mt. Everest assault team, camped at the 24,600 ft, level for twelved days waiting for the wind to abate, was exhausted just trying to breathe at that altitude. One veteran mountaineer described the feeling last week: "When you get that high, you just don't care. It's almost beyond human endurance."

But the determined party of Swiss climbers still did care. Mount Everest was still there, unconquered. Headed by Swiss Guide Raymond Lambert, 38, who had come within one ft. of Everest's summit last spring—the highest man has reached and lived to tell about it—the climbers clawed their way up the ice.

rocky, windswept slope. They could no

longer wait for the winds to abate. One unofficial report had it that the team of Lambert, Ernest Reiss, 21, a Swiss millitary aviation mechanic, and Nepalese Mountaineer Bhotia Tensing, 4c. arms within 550 ft. of the summit. But it turned out last week that the tenth assault on unassailable Mount Everest—the first time an attempt had been made after the monouno rains—shad ended in failure again. The climbers, despite their mew. Improved organ equipmerer still some 1,700 windowept feet from their souls windows the strength of the streng

When the news reached Switzerland last week, vetern Alpinist Rene Dittert, who had been with Lambert last spring, summed up what every Everest veteran knows: "It will require a kind of miracle to reach the top. British Alpinists, who have had a possessive feeling about Everest ver since 1924, when George Mallory and Andrew Irvine disappeared in swiring misst less than 1,000 ft, from the summit, were not waiting for miracles. British reaches were not waiting for miracles. British reaches the second of the summit were not waiting for miracles. British reaches the second of the second o

#### Higher Hopes Down Under

After the national tennis tournament at Forest Hills last summer, U.S. Davis Cup hopes hit bottom. The U.S.'s No. 1 player, Vic Seizas, was soundly whisped by a fuzz-cheeked Australian named Ken Rosewall, 17. Last week, at Australia's Victorian tournament, last warmup before the Davis Cup interzone finals, U.S. hopes were clearly on the rise.

In a quarter-final match. Seixas, despite recurrent attacks of hay fever, whipped young Rosewall in straight sets, 6-0, 6-2, 6-2. Two days later, facing Aus-

No one really knows how high Everest is. India's official survey figure lists ft at 29,002 ft. But Everest is growing (Time, July 14). Latest estimate by the Swiss: 29,610 ft.

tralia's "Big Fellow," rangy Ken McGregor, Seixas was a whirtwind, Rushing the net behind one of the biggest services in the game. Seixas took just 88 minutes to knock McGregor right off Melbourne's Kooyong courts. Again it was in straight sets. 27-5, 0-52, 0-52.

Australian tennis officials were flabbergasted. Even Aussie Veteran Harry Hopman, a canny, cautious type, grudgingly admitted: "The American captain's form was excellent. I don't think we have ever seen him better."

seen him better.

The Seixes victory over McGregor set the stage for a showdown battle between the U.S.'s playing captain and Australia's Frank Sedgman, Wimbledon and U.S. champion and generally considered the world's top amateur. The big match was

Vic Seixas After a whirlwind, the showdown,

rained out twice before it finally began this week. Then Sedgman, who relies heavily on his speed afoot. found the wee grass courts slippery going. He found Seixas' booming service and tantalizing drop shots even tougher to handle. Seixas won, 8-6, 3-6, 6-3, 6-4, and became the first U.S. player to win the Victorian Championship since Don Budge in 1937.

But one man alone cannot win the Davis Cup. While Australian Officials wor-riedly tossed coins to decide who was their No. 2 player, Player-Captain Seixas had already picked his man. The U.S. Navy gave young Tony Trabert a 20-day leave. The U.S.'s brightest hope before he went into service last year. Tabett is a establishment of the Company of the C

This week, just in time for the Seixas-Sedgman final. Trabert arrived in Australia. Seixas greeted him with open arms. Said Seixas: "I have felt all along that we have a good chance in the Davis Cup... Assuming Tony is near top shape, we should have a pretty strong team."

TIME, DECEMBER 15, 1952

# A gift of Beauty -- a joy forever

This charming decanter is a replica of those that graced the bars of famous taverns, inns, and sideboards of the Old South. In those by-gone days, whiskey was sold in barrels and served from decanters which are now antiques. Filled with the Aristocrar of Bonds, the Kentucky Tavern decanter is truly a gift of beauty . . . a joy forever. It comes to you at the same price as the regular bottle . . . Kentucky Straight Bourbon \* Bortled In Bond \* 100 Proof \* % Quart.

KENTUCKY TAVERN DECANTER

# AN INSIDE LOOK at this LEADER of a GROWTH INDUSTRY

#### RAYONIER READY TO MEET INDUSTRY'S INCREASING DEMAND FOR BASIC

#### RAW MATERIAL

Rayonier is in the chemical cellulose business. Chemical cellulose is the basic raw material for acetate, rayon, cellophane, photographic film and some of the wonderful new plastics. Today and for the foreseeable future, the most economical raw material for cellulose is wood. In order to support increasing output and to insure an adequate future supply, Rayonier has been adding to its acreage and now owns or controls 810,000 acres, an area larger than the State of Rhode Island. Able management of land and forest, control of cutting, reforestation, fire protection will provide ample supply for Rayonier's five, widely separated plants. Rayonier's future raw material requirements are now secured. Chemistry's need for a dependable source of chemical cellulose is answered

Rayonier's transporation system is larger than those of several small countries. In addition to a vast network of feeder roads, Rayonier has laid and maintains 625 miles of Grade A surfaced truck roads. Rayonier's railroad system includes 216.4 miles of track. 19 locomotives (from 45-ton to huge 131-ton Baldwins), 28 speeders, maintenance yards and roundhouses. The company operates its own radio communication network, broadcasting from Station KOB to receiving and sending stations at camps, and in speeders, locomotives, supervisor cars. This highly efficient coordination of transportation and communication over the far-flung Rayonier empire results in important savings in costs which finally reach the consumer in better fabrics, tires, rugs, plastics at lower prices.

#### FLANT AND EQUIPMENT

All Rayonier plants are large, flexible units. Each has approximately the same capacity. Each can manufacture many types of chemical cellulose. Equipment is modern and efficient. To meet the expanding demand for chemical cellulose in textiles and in new uses, Rayonier since 1945 has spent more than \$45,000,000 . . . more than \$4,000,000 in 1950, more than \$8,500,000 in 1951 . . . in improving efficiency, reducing cost, diversification of product, higher quality, greater capacity. With the completion in 1954 of the new plant at Jesup, Georgia, Rayonier will have spent more than \$80,000,000 in plant improvement and replacement. Thus, as more and newer types of chemical cellu-lose are needed, industry will continue to find Rayonier its most dependable source.

The Kayonier Research Dovision is the largeer organization in the U. S. A devoted to guished scientists are known the world over for their contributions to this field. Its facilities include the most modern equipment pilot plants that parallel the techniques of Rayonier's customers. Rayonier scientists determine the case with which Rayonier products can be processed, test the physical determine the case with which Rayonier counts and adapt Rayonier cellulose to the specialized needs of its customers. Rayonier counts heavily on its newly enlarged research labotatories to help maintain its commanding and to develop new and finer end products. Perhaps Rayonier's greatest asset is intramed, experienced technical starff and manramed, experienced technical starff and mannature of the properties of the properties of the control of the contro

#### 40 RDC'S FOR THE PROGRESSIVE NEW HAVEN

If anybody should know how to carry passengers profitably it's the New Haven. Nearly half its income is derived from this source, in contrast with most railroads where freight is king.

This adds significance to the fact that the New Haven has become the largest purchaser of Budd RDC's stainless steel, self-propelled, rail diesel cars.

In the nearly three years RDC's have been operating in this country and abroad they have compiled an impressive record. In performance, they have improved every schedule they were assigned to. In operation they have proved both reliable and economical—two RDC's saved one railroad \$600,000 in a year. In the comfortable, air-conditioned service they render, RDC's have increased passenger partonage—one RDC, operating in a new service between Worcester and New London, picked up 944 passengers in its first week.

Both New England and the New Haven will benefit from expanded RDC operation.

The Budd Company, Philadelphia, Detroit, Gary,

PIONEERS IN BETTER TRANSPORTATION

#### RELIGION

#### **Buddhist Bones**

Sariputta and Mugallana were the most honored disciples of the Buddha. Sariput-ta, dubbed by his master the disciple of "great intelligence", could expound doctrine, the story goes, with the same depth of meaning as the Buddha hismself. Moegallana was the disciple of "potency," and Buddhists believe that he could become invisible, control ferocious beasts and transport his hody through the air.

transport his body through the air.

¡Alter Sariputa and Mogazillana died
[about 480 B.C.), their bones were preserved inside two urique larges stone monuments at Sanchi in central India, which
became a central or Duddhis pletrimages,
became a better of Buddhis pletrimages,
them, but in 1851 a British military
eminer found the hoses and sent them to
London. They were bought by the Victoria and Albert Museum, and the caskets
containing the bones remained on view
there for almost a half centures.

After World War I. Buddhists began period of their two saints. Finally, in 1647. London sent them back. The relies were taken on a tour through India. Burma and Indo-China. Devout Buddhists claimed that hundreds of miracles were worked among those who saw them.

Last week the bones were ceremonious, by carried back to Sanchi. Firme Minister Nebru opened the celebration, and officials of eight Assiste countries were on U.Nu. Before a reverent crowd of 10,000. U.Nu. Before a reverent crowd of 10,000. The bones, encaged in glass, were carried up to a new stupia, built on a hillion near the old ruins. Then, while saffron-robed monks chanted Buddhist litanies, robed monks chanted Buddhist litanies. During the saffron-robed monks of the saffron-robed monks of the saffron-robed monks of the saffron-robed monks.

#### Logic in Cincinnati

Some Episcopalians and Presbyterians are fond of talking about a denomination-al merger—some green and pleasant future day; in Cincinnati, working unions have already taken place. In each case, the union was the result of simple, local logic,

In the new suburh of Indian Hill (pop. 2000). both the Preshyterians and the Episcopalians (including Senator Robert A. Taft) wanted churches of their own. but Ieft they were too few to build two churches and support two pasters. To-churches and support two pasters. To-there are the support two pasters are the support two pasters are the support to the su

In down-at-the-heel West Clincinnati, the members of the West Clincinnati Pres-byterian Church and St, Barnabas' Epis-copal Church, faced with similar problems, united in 1045. Now, with a combined membership of 200, they meet in the West Cincinnati church (now called Rew, Maurice McCrackin, as mioster. The church is also interracial; about a fifth of its members are Negroes.

The two congregations function in slightly different ways. Indian Hill holds Presbyterian and Episcopal services on different Sundays: St. Barnabas' uses a simplified litrupy at all its services. New members are received into both denominations, i.e., the bishop lays his hands on the confirmand in the Episcopal rite of confirmation, and the pastor then extends

#### Possibly Eternal

Manhatan's Metropolitan Museum is less concerned with contemporary art than with the possibly eternal; in general, it leaves purchases of recent art to others. But last week the most of the contemporary of

Sculptor Zorach took three years to carve his warmly maternal Mother and Child from a three-ton chunk of rosecolored marble. In the sculpting, he ignored the common practicle of making a plaster model and translating it into stone mechanically. In an older and more honored tradition, Zorach worked the marble freehand, using a small plaster model only

as a guide.

He finished his carving in 1930, later displayed it in turn at Chicago's Art Institute, Manhattan's Museum of Modern Art, Cleveland's Museum of Art, and the Metropolitan. It is the first purchase by the Metropolitan out of a new Stoocoo fund for the acquisition of contemporary American seulpture. Says Director Francis

## Taylor: "We fell in love with it." Old Montana Master

In Montana in the 1880s, Charles Marion Russell was just "a kid who drew things" when he was not working as a cowboy. He drew handsome, storytelling pictures of the Great West, full of livelooking cowboys, Indians and galloping horses. He sold them for \$5, or even less, until he learned that some people would pay a lot more. He found this out when a man from Boston asked the price of two paintings, As Cowboy-Painter Russell told it later: "He was a plumb stranger . . . so I said \$50. And I'm a common liar if the fellow didn't dig out \$100 and hand 'em over. He thought I meant \$50 apiece . I didn't say a word. I just bought the fel-

ZORACH'S "MOTHER AND CHILD"

low a drink and kept the rest. He don't know to this day how bad he beat him-

Russell died at 62 in 1926, still protesting that he had no idea why some collectors paid the prices they did for his canvases. Yet he exhibited in London, New York, Chicago and Los Angeles, and sold several paintings for \$10,000 apiece-to Canada for the Prince of Wales, to Douglas Fairbanks, William S. Hart, Oilman he called "dead men's prices," meaning the price of an old master. Nonetheless, Charles Russell knew what he could do and had a master's pride in his talent. Standing before a display of modern art, he once said: "I can't savvy the stuff. It may be art, but it's over my head, I may paint a bum hoss, but people who know what a hoss looks like will know I tried to paint a hoss."

Montanans, who know what bosses look like, are proud of Charles Russell's talent too. Last summer they raised \$70,000 lby too. But summer they raised \$70,000 lby commin Great Falls. Last week, as the elimax of another public fund drive, the Montana Historical Society took title to a private collection of Russell paintings vallenged to take \$50,000 for the collection, after a drive was launched to keep it in the state. Its destination, the new Russell was a funded to the Russell Rus

Agendaria Distillation might well have objected to all this attention was plain-speaking Charley Russell himself. "In my book," he once told a Montana booster meeting, "a pioneer is a man who comes to a virgin country, traps of all the furnishment of the control of the contro

#### Museum Guides on Tape?

In Paris last week art lovers trooped to the Galerie Royale to see something billed as "The Art Gallery of the Future." The future turned out to be electrified. As visitors grouped before each of the exhibits, an attendant pressed a button. Thereupon, a spotlight larged on and a laper-recorded voice boomed out a learned commentary.

The recorded spiels were the idea of Marcel LeGrand, director-general of the Société Bénédictine of Féramp, manufactures of Benédictine liqueur. He installed at the spiel of the spiel of

#### INSIDE-OUT WINDOW

Nearly all of the world's most beautiful churches are pure Gothic, and many of the least beautiful are latterday imitation Gothic. Even in the functional-minded mid-oth century, few architects have tried to break the mold, and only a rare few have had any success at it. One of the boldest tries is Joseph D. Murphy's gymnasium-like St. Ann's Catholic Church in Normandw. Mo.

Nothing about the church is more functional. or more imaginative, that its 38-ft-square window, which Emil Frei and Robert Harmon designed. Since the window daces the congression, they made it only partly transparent—to cut down plare. By day, the opaque areas appear in silhoutett, with interno lighting at ingital, they stiff in design, and the window's weaving composition is contrastingly, amorphous.

contrastingly amorphous.

In combination, Frei, Harmon and Murphy have done
a difficult job well, and their pioneering will help open
the way to freer church designs.

#### MEDICINE

#### A Sharper Image

An estimated 150,000 people in the U.S. who are not truly blind have to be treated as if they were, because they have so little useful vision that ordinary spectacles yield them only a faint, blurred image. This week. Columbia University's inventive optometrist. Dr. William Feinbloom, announced that he had found a way to restore workaday vision to about half these patients so that they can read newspapers, watch TV or even do precision work in factories

Conventional spectacles, Dr. Feinbloom explained, are simply magnifying glasses with lenses shaped like part of a sphere. No matter how much they magnify, they do not have enough "resolving power" to

#### Mixed Sex

Such words as "hermaphroditism" and 'pseudohermaphroditism' have mostly textbook talk in the U.S. until last week, when newspapers and radio brought them into shop and household (see Press). If most of the pseudoscientific chatter at the luncheon table made little medical sense. doctors themselves were largely to blame, because they have used some of the key words in different and confusing ways,

Hermophroditism. After about five weeks of life in the womb, the human fetus develops a sex gland (gonad) which at first cannot be identified as male or female. Within a week or two, in normal growth, it becomes recognizable as either

# UBLETS FOR VISION Clear Blurred image received from single spherical magnifying lens

project a sharp image on the retina (the screen at the back of the eyeball) if the retina is damaged. Most partially sighted patients have retinas like a coarse-grained photographic plate: they can record a sharp image only if they are fitted with a fens of unusually high resolving power.

To achieve this, Dr. Feinbloom applied the principle of the microscope and made doublet lenses-really two lenses in a plastic rim. with a sealed air space in between. He also flattened the outer curves of the lenses from spherical to paraboloid shapes. The doublet lenses focus at infinity and the eye itself makes the focusing adjustment for objects beyond a few feet away. A short-focus pair is used for reading.

To show what the doublet glasses can do. Dr. Feinbloom told of a twelve-yearold Ohio girl who was born with part of the retina missing. Her sight was so poor that she could not go to regular schools and was learning Braille. With doublet glasses she breezed through elementary school. She got through high school with honors and now, at 17, is in college taking journalism and working part time as a reporter.

the female kind that will develop into ovaries, or the male kind that will become testicles. Sometimes, nature gets its wires crossed and the luckless infant develops one ovary and one testicle, or an inter-mediate type of "ovotestis," and some of the genital organs of both sexes. This is true hermaphroditism.º though Pediatrician Lawson Wilkins of Johns Hopkins, a top authority on the subject, prefers the

On the rare occasions when such cases come to the operating table, their doctors must decide whether there is a physical leaning toward one sex or the other. They must also consider whether the patient has been reared as a boy or a girl. Then the surgeons leave as nearly perfect a male or female as they can. Less extreme cases, which show only a few features of the opposite sex, are proportionately easier

Pseudohermaphroditism, This clumsy term covers a wide variety of cases. Pediatrician Wilkins argues that one type, at

least, should be classed as intersexuality. This covers cases in which the embryonic gonad definitely takes the form of one sex, but other sex organs resemble those of the opposite sex because of a mix-up in the opposite sex because of the opposite sex b

Such a case is likely to be a male whose maculine glands and organs are so malformed as to be mistaken for female. When this condition is discovered (often as late as puberty, though it should be earlier), the bliggest problem is psychological. Such a child will have been reared as a gift, and the emotional switchover to as a gift, and the emotional switchover to some patients refuse the burdle; then the doctors make them more womanly.

Probably commoner, says Dr. Wilkins, are cases in which disease of the adrenal glands causes an excess output of the male hormones. If the trouble starts in a baby girl still in the womb, it brings on outward physical changes and makes her look like a boy. In a few years she will have a deep voice and may start to grow a beard. If the trouble comes later in childhood (perhaps as the result of an adrenal tumor), most of the changes will be superficial-flat chest, narrow hips, deep voice and hirsutism. In a boy, the effect is to produce excessive virility, commonly shown in sexual precocity and premature growth of body hair.

In either sex, undetected adrenal tumors usually kill the victim. The best remedy is surgery to remove the tumor. This restores the normal balance for the patient's sex. For overactive adrenals with no tumor, small doses of cortisone now do the trick.

Homosswolity, Because of emotional disturbances usually in childhood, physiologically normal males may develop the social attitudes of females and vice versus. Homosexuality is not inherited and has more balance. But many homosexuals refuse to admit this, and they reject the psychiatric treatment which offers them some chance of a normal social life. Many of them were the clothes of the opposite sex, and pester endocrinologists for horself the control of the control

A few homosexual men have tried to persuade U.S. surgeons to operate on them to change them into pseudowomen. Most surgeons will have nothing to do with what they consider a crime against nature and the laws of the 48 states.

tion) is coming back into fashion. He himself has fathered two specialists.

¶ "Woolen underclothes," snapped snapped Dr. Gerald Gibbens in the Practitioner (London), "are expensive, difficult to wash, and are water-repellent, so that when we move with any energy at all we sweat and stay wet and itchy and smelly for the rest of the day." His remedy: "dishcloth un-derclothes," knitted of cotton yarn. Just as warm as wool, he says, easier to wash, softer-and cheaper, too.

#### Good, Green Fun

The chlorophyll craze which has been sweeping the U.S. for two years or more has no justification in scientific fact, the American Chemical Society heard last week from a topflight chemist, Professor Alsoph H. Corwin of Johns Hopkins.

In the first place, said Chemist Corwin, little is known about the action of true chlorophyll in the human body, and most of the technical literature on the subject is full of myths. Anyhow, the material used by manufacturers of green pills, chewing gum, toothpaste and mouthwash is not natural chlorophyll: it has been altered chemically and sometimes contains copper. Much of it is labeled "copper chlorophyllin," and even this is a misnomer, said Corwin, because a "phyllin" is a magnesium derivative; when

# America's best sales team

Why has television caught on so quickly? Because, of all the senses, sidht convexy the deepest, sharpest, longest-lasting mental impressions. A customer's eyes are the best, and cheapest; sales team you can hire. That's why it pays to reappraise your packaging ever so often. Monsanto Chemistry can help. Here's just one example:

A West Coast fee cream company wanted customers to see the appetiting colors, fine texture and rich, creamy quality of its product, I has just brought out a new transparent re-use package of Lastree\* styrene plastic. This rigid moddled poit jar, usable for other food products as well, was the talk of the recent package, which was the talk of the recent package. More important, it's proving, a runaway sales success.

So it goes through the whole range of packaging. Contel-paperbard milk containers made dripless by Monsanto montoice plasticizers, also used the flexible wraps for fish, pickless other food products. Smart new past-lettined jars of Lustrex plastic that are ringing the cash register bell for several national cosmetic lines.

Also, rigid, transparent parkages of Vuepuk's acetate; attractive buttle and jar closures of Resinox's phenolic; flexible wrape and bags of Ultron's vinst film. Cans with nontoxic inner linings of phenolic coating resins and outside lithography protected with melamine resins. Paperboard containers of all kinds, sized with Mersize's and printed with links flatted with Santocel.'s

Changing the package often means changing the sales curve from a Death Valley plateau to a Pike's Peak climb. See what Monsanto Chemistry can do to help. Just write:

MONSANTO CHEMICAL COMPANY, 1700 South Second Street, St. Louis 4, Missouri, Monsanto Canada Limited, Montreal, Vancouver "Res. U. S. Pet. 08

# Empty...

# all too often

There's an empty chair

at too many business conferences these days.

It's the chair that should be filled by the Traffic Manager...

whether it's purchasing or production,

sales or distribution ...

that's under discussion.

Having a Traffic expert on your top-level management team gives you an edge over competition. Many companies made that discovery years ago... and it's been paying off ever since.

#### You're the one who pays the freight ...

even when you don't get the bill. For transportation costs are reflected in prices, not only for what you sell... but for what you buy as well.

That's why profit-conscious management is showing a more than passing interest in transportation methods and techniques. That's why, in many companies, the Traffic executive... call him the Traffic Manager if you like... is playing a more and more vital role in overall planning and operation.

#### Traffic Management has come of age

The day when the title "Traffic Manager" disguised a glorified shipping clerk is long past. For just as the Army has recognized the Science of Logistics, so has alert management come to recognize the Science of Traffic Management. And bigger profits pay tribute to their vision.

# Chesapeake and Ohio Railway

TERMINAL TOWER, CLEVELAND 1, OHIO

The Cheapeake and Ohio Railway, as one of the great carriers of merchandise freight in the country, is vitally interested in any plan that will move more goods, more efficiently. That's why we aponsor this series of advertisements about the Traffic Manager and his job. The Traffic Man is management's answer to better and more economical movement of material.

# Little Red Schoolhouse...1953 Style

 Gone is the little red schoolhouse... and with it massed a symbol of education in America that brings a feeling of ford mostaliga to many. But it also left memores not so pressant to contemplate, important as it was, it had its drawbacks... such as improperly verificated, ill-lighted rooms, that were seldom positioned to use netural daylight.

Today's functionally designed school is a new concept of educational shetter...less like an institution...more like a home. This informal residential character is achieved with Ceco steel joid construction providing large square "Blaubbi" classrooms.
Walls of Deco steel and aluminum windows flood crooms with natural daylight for better sight. Ceco metal windows ofter controlled ventilation... (light weather seal... they won't warp, slick or evell... maintenance cost lowest of all.

The little red schoolhouse, 1953 style, is another example of how Ceco adds to the improvement of shelter . . . for no matter where you live, work, learn or play, shelter is better today, made so by Ceco steel and aluminum building products.

#### GOVERNMENT More SEC Scandals

Sixteen months ago. New York's Democratic Congressman Louis B. Heller bean looking for skeletons in SEC's closet. Last week, after poring over 742 cases from SEC's files and calling roow witnesses. Heller's subcommittee handed in its review of the commendate job." Birch and done witnesses the commendate job." Birch and commendate job." Birch and done witnesses with the commendate properties of several controversial cases, said the incoming Congress should investigate further. Among the cases:

The Badger Case, involving Salt Lake City Broker-Dealer Richard C. Badger, who committed suicide in March 1964 after embezaling \$648,000 from his customers. SEC examiners had found nothing wrong with his books, though he had filed false reports with the agency since 1943.

The Tucker Auto Case, in which Promotor Preston Tucker's company went bankrupt before his rear-engine car got into mass production, SEC, said the committee, had waited too long in exposing the Tucker Corp.'s misleading statements about its solvency and prospects: "Had it done so, part of the loss which the invest-

36

Munby Peale After the Rainbow, a gamble.

ing public sustained in the Tucker case might have been averted."

The Koiser-Frozer Cose, in which Cyrus Eaton's Otis & Co. backed out of a

stock-floating deal with K.-F. K.-F fort a S<sub>1</sub>1,23,743 uit against Oils because it misrepresented its earnings in its registration statement of the stock issue. The SEC showed bias against Otis and in favor of K.-F. said the committee, and still has a fraud charge pending against Oils. "But, at the same time," said the committee. "If it has not moved against Kaiser-Frazer although the charges and counterathough the charges and counter-

charges arose out of the same transaction. The Heller subcommittee called SEC's handling of the proposed K-F stock issue 'a shocking story of errors, indifference and evasion.' It charged that SEC staffers had been 'asleep at the switch' and that SEC had conceded it overlooked the misleading statements by K-F.

#### AVIATION

Through the Sonic Barrier

On the flat land of Edwards Air Force Base in California, a cluster of scientists and Air Force brass watched a silvery. swept-wing jet fighter roar down the runway and into the air for a test flight. It climbed high in the air, then leveled off and shot across the air base with a roar like a thunderclap. This week Long Island's Republic Aviation Corp. proudly announced the results of the flight; its XF-91, powered by a General Electric J-47 turbojet and a Reaction Motors rocket engine, had become the first U.S. combat plane to fly through the sound barrier in level flight. (Other supersonic planes, e.g., the Bell X-1 and the Douglas Skyrocket, are experimental speedsters faster than Republic's XF-91 but not designed for battle.) The XF-91 had performed the trick with an extra push from its rocket motor.

Republic made other news bat week. It delivered to the Air Force it Snire production model of the F-84F Thundersteak, as sexpt-wing version of the F-84 Thundersteak, as naturally of the NATO air force. Capable of the NATO air force air

Flying High. The two new planes were the latest evidence that Republic, which went into a dive after the war, was flying high again. Both the development of the planes and Republic's present place as one of the top air U.S. planentkers are due to calculated gambies by President Municipal and the planes and Republic's present place as one of the planes and Republic and the planes of the fluid and the planes are designed to the planes are designed to the planes and the planes are designed to the planes a

REPUBLIC AVIATION'S F-84F & XF-91 After the Thunderstreak, a thunderclap.

joined Republic in 1939, became its president at 40 after a notable wartime production career.

Under Ralph Damon, now president of T.W.A., and the late Alfred Marchev, Republic racked up an impressive wartime record by turning out more than 15.000 P-47 Thunderbolts. Mundy Peale's part in that program was managing Republic's Evansville, Ind. plant, which turned out more than 6,000 P-47s. But when Peale was made Republic president in early 1947, he faced problems galore. The company had an order for 100 Thunderiets, its first jet fighter, but it was losing money on the Seabee (TIME, Sept. 17, 1945), a small private amphibian, and was \$7,000,000 in the red. To make matters worse. American Airlines and Pan American Airways canceled orders for the four-engine Rainbow transport, the only transport orders Republic had. Then Peale took his first gamble; he decided to junk the Seabee program, stop trying for civilian orders, and stake Republic's future on Government contracts.

He landed more orders for the Thunderjet, and poured \$1,000,000 into developing the prototype of the F-84F Thundestreak, He landed a contract for Force requirements were met, the plane was much beavier and needed a more powerful engine. Peale, on a trip to Britain's Farnbrounds Air Show, saw Armstrong Siddeley's Supplier and decided it was the engine he needed. He suggested was the engine he needed, the suggested and Curtiss-Wright signed up to make the British engine in the U.S.

\$100 Million Bet, When the Korean war started. Peale tried a much bigger gamble. Republic production was down to ten planes a month, employment to 5,000 (from a wartime peak of 25,000). But knowing that new orders were sure to come in. Peale canceled vacations, started hiring men at the rate of 100 a day, and told his purchasing department to make out orders for \$100 million worth of materials and equipment-all before Republic had got so much as a letter of intent for new planes. When the orders came through a few weeks later. Republic was ready. In all, it has delivered more than 3,000 Thunderjets to the Air Force and eight NATO nations, is now turning out ten planes a day. In the first nine months of 1052. Republic grossed \$215 million for a net of \$4,000,000; it still has a

backlog of \$1 billion. Like other planemakers, Peale thinks it is time to eliminate the feasts & famines that have plagued the aircraft industry in the past. Says he: "The cost of starting up production is four times that of keeping it going in a small way." Peale therefore hopes that the Air Force will adopt a proposed plan to let planemakers maintain their planes after they have been delivered to the Air Force, thus keep a nucleus of workers after rearmament orders taper off. Such action, says Peale, will not only keep the industry's wheels turning but will, in the long run, provide a bigger Air Force for fewer dollars.

#### Connie v. Comet

Some pessimists fear that Britain's swift but short-ranged jet Comets will capture air-transport supremacy from U.S. planes. Last week, Lockheed Aircraft Corp, tried to cheer up the mounters. It showed did Super Consellation, a piston-type plane which will not only carry about three times as many passengers (op) as the Comet I, but cover long hauls in less than the control of th

The Super Connie gets its extra speed and range from four of Curtiss-Wright's new 3,250 h.p. turbo-compounded engines. which use the previously wasted exhaust blast to whirl three small turbine wheels. giving 20% more power to the propeller shaft, With them, the Super Connie reaches a cruising speed of 340 m.p.h., or 13 miles faster than the non-compounded Super Connies already being flown by Eastern Airlines and T.W.A. The U.S. Navy will get the first model late this month. In March, Lockheed will deliver the first commercial model to Royal Dutch Airlines (KLM), one of eleven international airlines which have ordered it. Eastern will get the first U.S. deliveries in late 1953.

The interior of the new plane has been designed by Henry Dreyfus for greater comfort and beauty. To eliminate the streeter's look, he broke the interior up fixed the streeter's look, he broke the interior up large a living-room effect, put in a mid-plane lounge with fabric-covered sofas, and chairs with disappearing arms and built-in headersest. The plane's large, rectangular windows give \$5% more visibilities of the street of the s

types of service, luxury, tourist and coach. While not so fast as the Comet, which cruises at 480 m.p.h., the Super Connie, with a much longer range, will be able to fly from London to Johannesburg with one stop in 20 hours, a trip which now takes the Comet about 24 hours, with five refueling stops. Furthermore, the Super Connie itself will shortly take an intermediate step toward jet propulsion in a "turboprop" (i.e., jet-driven propellers) version as soon as turboprop engines are available for commercial use. (Lockheed is already building two Super Connies with Pratt & Whitney T-34 turboprops for the Navy.) These engines will give the Super Connie a cruising speed

(445 m.p.h.) close to that of the Comet. With the Super Connie. Lockheed expects U.S. planes to be able to keep their ocean dominance until 1956. the earliest time when Britain expects to have jet transports with a range long enough for the Atlantie, even with stops. By then, the U.S. expects to be building big jet transports of its own.

© T.W.A. and Pan Am now schedule nonstop flights to Europe, but planes frequently have to make refueling stops.

N.A.M.'s PRESIDENT SLIGH We must speak for all men.

# MANAGEMENT "No Time for Gloating"

How do businessmen want to be treated by the new Administration? Do they expect special privileges because so many worked for Eisenhower? Do they expect to benefit from the selection of businessmen in the Cabinet? To these questions, the nation got some statesmanlike answers from businessmen last week. They came at the Manhattan convention of the National Association of Manufacturers.

Saludia Association of constitution of the second of the s

"Furthermore, we must do more than speak. We must also act. We must continue to be sure that wise words are backed by sound deeds. It is now time to rededicate ourselves to our responsibilities as businessmen. Businessmen are responsible to all the people who have a stake in their enterprises. That includes stockholders and employees and customers. It also includes the general public...

"For all too long business has been the whipping boy of Government. Now that we have the opportunity to be treated as respectable equals on the American team, let us be fully worthy of our trust. This is no time for gloating. It is no time for talk about turning back the clock, or even thinking about it. The only thing we can

SCIENTIFIC CLEANING MATERIALS

since 1890

J. I. Holcomb Manufacturing Company New York, INDIANAPOLIS 7, Los Angeles ask—and the greatest thing we can ask of the new Administration is that businessmen be accepted as equal partners with labor and farmers and other groups in the task of carrying America forward as the land of freedom and opportunity for all . . . .

Carrier Corp.'s Vice President Howard M. Dirks interpreted the NAMsters' new gospel as to their dealings with labor. Said he: "Let's hope that none of us thinks ... that we can now return to some of the autocratic or paternalistic methods of

dealing with employees . . practiced in the past. We have learned a lot . . in recent years . . and we dare not step backward." Said N.A.M.'s Managing Director Earl Buuting: "Self-interest dictates the highest order of industrial statesmanship . . in the public interest."

"Stort Buying." NAMsters felt strongby that industrial statemanship calls for "trade, not aid" in the nation's dealing abroad, N.A.M., which years ago was a prime backer of high tariffs, seemed to agree with such other business groups as the Detroit Board of Commerce (Thur, agree with such of the business of the Jersey Standard's Vice President John R. Suman, a top man in N.A.M.'s foreign policymaking: "As we stop giving and start buying more from our friends abroad, we will be helping them along the road to economic recovery. And we can do that most effectively by reducing our own trade most effectively by reducing our own trade

It was McGraw-Hill Publishing Co.'s Executive Vice President Willard Chevalier who summed up N.A.M.'s new goalsand its enlightened means of reaching them. Said he: "Government | should | recognize . . . that no act of Government can increase the national wealth, insure the national security, or raise the living standards of the people unless that act helps to bring about a higher productivity per man-hour on every front of the economy . . . Only by a higher production of goods and services per man-hour . . . can we provide higher wages, shorter hours longer vacations, old-age security and all the other social benefits.

As its new president, N.A.M. elected Charles R. Sligh Jr., 46. the youngest man in 30 years to hold the post. Sligh, who was born in Grand Rapids, Mich, and still lives there. is head of four furniture companies which employ 400, will gross about \$4.500.000 this year.

He quit Colgate to take a job as a construction laborer, did a stint as a blacksmith's apprentice before joining his father's furniture company. In 1933, when the furniture industry's average loss was 14¢ on the sales dollar. Sligh decided to start a company of his own. With a partner and \$14,000 capital, he astounded the industry by turning a profit the first year. has never since recorded a loss. months ago, when the A.F.L. Upholsterers International Union tried to organize one of his companies, he called a meeting of employees, and turned it over to the union organizers to make their pitch when they were done, Sligh answered

## This CRANE VALVE took a load off the maintenance budget

This case shows the thrift that results in buying quality valves. They save production losses as well as maintenance costs. Here, in a starch plant under corrosive conditions, this Crane valve outlasted other valves more than 5 times. And it still continues to give, perfect service. That's what Crane quality means in valves for every service.

#### Read these Facts of the Case!

Where Installed: On raw materials inlet to starch converter. Valve constantly exposed to corrosive effects of hydrochloric acid vapors from converter, at working pressure of 50 psi, 280 degrees F.

Irouble Incountered: Valves formerly used needed repairs every 2 to 3 weeks, and had to be replaced every 3 to 4 months. Down time for converters was excessive: valve maintenance costs ran extremely high.

Solution and Result: The trouble was stopped by installing Crane Ni-Resist cast iron gate valves with 18-8 Mo Alloy trin. Inspected after giving 19 months' service without interruption, these Crane valves were still in excellent working roadition.

## Flowers Are Beautiful Business Builders

"I get around a lot, you know, during the Christmas Season.

And the one remembrance that, I find, enjoys
universal acceptance and appreciation is flowers."

Thousands of businessmen agree with Santa. You just can't find a nicer way to extend Christmas wishes than with Flowers-By-Wire.

And Flowers-By-Wire enable you to flash your greetings all around the world in a matter of hours. 18,000 members of F.T.D. and INTERFLORA are ready to deliver fresh flowers... potted greenery... or blooming plants...together with whatever message you want to include.

Look for the FAMOUS F.T.D. MERCURY EMBLEM. It identifies the shops that guarantee delivery.

#### THERE'S A PLACE FOR A PLANT IN EVERY MAN'S OFFICE!

Florists' Telegraph Delivery Association

them point by point, but assured his employees they had every right to organize. In the election that afternoon, the union polled only 30% of the votes.

Like many another NAMster Sligh thinks that government spending can be cut by more than \$14 billion in the next year. Such a cut, accompanied by lower taxes, says Sligh, should bring no business slump. Says he: "The people have tremendous confidence, and confidence always breeds prosperity."

#### AUTOS

#### The Aero

The biggest change in Willys' new Acro line, brought out this week, is in the price tags. On the several two-door models—the only passesper-car line Willss could tions—price cuts ranged from S88 to \$815, 10 1953, with more steel available. Willys will broaden its line to include a hardrop convertible (Acro-Eagle) and four-door sections. The four-door models will be weeken. The four-door models will be weeken.

#### BANKING

#### Prize Day

In a driving rain last week, block-long crowds lined up four-deep along Manhattan's Madison Avenue for the opening of a new bank. "Look at them; said Manatan's Madison, Avenue for the opening of a new bank." Look at them; said Manatan's Manatan's

The spacious room was decorated with flags, flowers, and a 37-ft. mural of old New York; music floated in through loud-speakers. Everyone who showed up got a free piggy bank and free chances on 18 prizes ranging from a new Mercury to a trip to Bermuda and Nassau; those who opened accounts of \$5 or more got pen & pen is the pen is the state of the pen is the state of the pen is the state of the pen is the

Banker Denton proved that in banking, as in retailing, it pays to merchandise. In two days, 100,000 people swarmed through the new headquarters and the bank, whose accounts had numbered 125,000, signed up 20,000 new customers with \$1,300,000 in deposits.

#### New Boss for Chase

When John Jay McCloy became president of the World Bank six years ago, without any past experience in banking, he laughingly called himself in illegitimate banker." Last week he was legitimatized. He was named to aucceed Winthrop Adrich, the new Ambassador to Chase National Bank, the nation's third biggest.

Jack McCloy, 57, a Philiadelphia-born

lawyer, has had experience in many fields other than banking. His two chief talents are tireless energy and the ability to bring

6-TON SHAFT reaches down to one of the six giant Worthington centrifugal pumps that lift 2,000,000 gallons of Sacramento River water 197 ft every minute.

## 6-ton "muscles" for the biggest irrigation project ever undertaken

HUGE VOLUTE CASING of one of the Tracy Plant's 84-inch Worthington pumps being assembled inside a concrete form. The next step was to completely imbed it in concrete.

The job was literally to lift a river. In the Central Valley of California, the Sacramento River has a super-abundance of water. The San Joaquin Valley, with its potentially rich farmlands, thirstily needs every drop it can get. The big catch was moving water from one to the

other

The solution? Lifting two million gal-Ions of Sacramento River water 197 feet every minute. This is the largest massmovement of water ever attempted. It is made possible at the Tracy Pumping Plant by six Worthington 22,500-horsepower pumps, so huge their shafts weigh six tons apiece. Such pumps could fill an ordinary 100,000-gallon city water tank in just three seconds.

So sure were the engineers on the job of the in-built soundness of these pumps

DISCHARGE LINE ASSEMBLY dwarfs this workman. Three such lines carry the river's water about a mile upgrade to the Delta-Mendota Canal which flows into the San Joaquin Valley,

that they had them completely imbedded in concrete!

### "A Lion in Your Lap!"

The idea of adding a third dimension to movies themmovies is almost as old as movies themselves. But to moviegoers, the illusion of depth is a perennial novelty, Olf & on, through the years, it has always drawn mount theaters in Les Anaeles, record audiences were queueing up to see an Ansoc color movie called Bissens Devil, the first feature picture ever made in "three dimensions."

The process that fascinated audiences is called Naturul Vision a new twist on the old stereoscope and on M-G-M's 1937 two-real "depthies." Two projectors shrow separate images on the screen. The light of each image is polarized, i.e., filtered so that it "vibrates" in only one plane, at a right angle to the other image. Wearing glasses fitted with polarizing lenses (furnished by the theater management), the viewer sees a different picture with each see, this brain combines the images into a

No kin to Cinerams (Thate, Oct. 13), which achieves the depth illusion by nearly surrounding the viewer with the picture, Natural Vision was developed by Milton Gumborg, an ex-ercen writer, and process was licensed by radio's veteran Producer-Writer-Director Arch Oboler, who turmed out Basson Devis, a Jungle yam starring Robert Stack, Barbara Britton and some man-eating lims that almitted the building of an African Lindow, and the building of an African Unimpressed by newspaper and that

promised the customers: "A lion in your lap! . . A lover in your arms!" Los Angeles critics quarreled with the movie itself, the sensation of jungle leaves in the face, the eyestrain produced by the glasses.

But the public nonetheless flocked enthusiastically to get a look at Natural Vision. Last week's gross at the two theaters: \$95,000.

#### The New Pictures

Million Dollor Mermaid (M-G-M) is a splashy musical that casts Cinemermaid Esther Williams as Annette Kellerman, the foremost amphibian attraction of the early 1900s. The picture takes Annette, who is described as "balf woman and half

MILTON GUNZBURG
Never mind the eyestrain.

fish." from Sydney, Australis to London, where she makes a much publicated 36-mile swim down the Thames; then to the New York Hippodrome, where she is billed as a diving Venus in tank extravaganas; and finally to Hollywood, where she is hadly injured during the filming of an underwater picture. For romance, there is a conventional (and fictional) triangle involving the Hippodrome's impressing (David Brian) and America's manager, the she married in real life and with whom the still trim, 64-year-old ex-bathing beauty lives today in Santa Monica. Call

The picture is as tailored to Mermaid Williams' specifications as the one-piece bathing suits she wears in the picture (Annette Kellerman duringly introduced the one-piece suit at years ago.) Free water ballets, chuming with sky-high fountains. Technicolored smoke effects and choruses of movie mermaids and mermen sliding down chutes and divings of swings. So Iong as it stays in the fun, in its landlocked sequences, it is just another day cinholography.

Face to Face (Huntington Hortford; RKO Rodio) is a two-part picture of mixed merits that gets its title from Rudyard Kipling's The Ballad of Bast and West. ("But there is neither 'East nor West, Border, nor Breed, nor Birth, When two strong men stand face to face, though they come from the ends of the earth!")

The first episode, based on Joseph Conrad's The Secret Sharer, considers the moral dilemma of a young captain (James Mason) who gives refuge on board his ship to a murderer (Michael Pate), and, after much soul-searching, decides to set

## Clipping the wings of flying glass

No matter how you travel-by land, sea, or air-

Birds flying in the airways . . . pounding waves at sea . . .

you are protected by a sandwich of shatterproof glass

emergencies on the highway or railroad—these are among the many things that can cause broken windshields and windows while you are traveling. That's why the windshields of America's sky giants today

That's why the windshields of America's sky giants today are made to withstand hail, wind pressure... and collision with even an eight pound bird at the plane's cruising speed.

ELIMINATING A SOURCE OF DANGER - Today the danger of razor-sharp pieces of flying glass has been virtually eliminated. Most cars, trucks, trains, and ocean liners now have safety glass as standard equipment.

In making safety glass a sandwich of glass is made with a tough, clear plastic spread called vinyl butyral resin. It's this plastic that holds the razor-sharp pieces safely in place if the glass is broken.

PLASTICS SERVE YOU IN MANY WAYS - Other forms of highly versatile plastics go into your newest

home furnishings, kitchenware and appliances. They are also essential to modern rainwear, paint, electrical insulation, and high-strength adhesives and bonding materials.

UCC AND MODERN PLASTICS—The people of Union Carbide, working with the glass industry, developed this plastic for modern safety glass. This and a variety of other plastics are but a few of many better UCC materials that help industry serve all of UCC.

FREE: Learn more about the interesting things you use every day.
Write for illustrated booklet "Products and Processes" which tells
how science and industry use the ALLOYS, CARROYS, CHEMICALS,
CASE, and PLASTICS made by Union Carbide, Ask for booklet J.

## Union CARBIDE

AND CARBON CORPORATION

Conrad's story wrestled with one of his favorite themes: the judge and the judged. By jettisoning the inner probing and the moral preoccupation of the original, the film emerges as a becalmed, dialogue-ridden mood piece.

Far better is the dry humor of Stephen Crane's cowpoke story, The Bride Comes to Yellow Sky. A hard-drinking, fastshooting old reprobate named Scratchy (Minor Watson), the last bad man left in the little western town of Vellow Sky, is sadly disillusioned when his longtime antagonist, the town marshal (Robert Preston), brings home a bride. Confronted with an unfamiliar atmosphere of respectability. Scratchy resignedly throws away his six-shooter and says farewell once & for all to his glorious gun-toting past. In James Agee's lean adaptation and in some peppery performances. The Bride Comes to Yellow Sky captures much of Crane's pungent idiom, and becomes a spry blend of gun-in-holster and tongue-in-cheek.

The twin picture is also a double debut. It is the first offering of Huntington Hartford, 40-year-old art patron and heir to A &P millions, who decided to turn producer, with plans to deliver, two pictures a year during the next three years for RKO release. It also introduces to the screen it as the beguiling bride of Crimes sheriff. If the produce of the Section of the produce of the picture of the screen is a section of the produce of the screen is a section of the produce of the section of the produce of the produce of the section of the produce of the produce of the section of the produce of the produce of the section of the produce of the produce of the section of the produce of the produce of the section of the produce of the produce of the produce of the section of the produce of the produce of the produce of the section of the produce of the produce of the produce of the section of the produce of the produce of the produce of the section of the produce of the produce of the produce of the section of the produce of the produce of the produce of the section of the produce of the produce of the produce of the section of the produce of the produce of the produce of the section of the produce of the produce of the produce of the section of the produce of the produce of the produce of the section of the produce of the produce of the produce of the section of the produce of the produce of the produce of the section of the produce of the produce of the produce of the produce of the section of the produce of

### CURRENT & CHOICE

Forbidden Games. A small French masterpiece that looks at a grownup's warring world through the realistic eyes of a child (Trate, Dec. 8).

Hans Christian Andersen. Producer Sam Goldwyn's lavish musical fairy tale about Denmark's famed spinner of fairy tales; with Danny Kaye. French Ballerina leanmaire (TIME, Dec. 1),

Breaking the Sound Barrier. A soaring British film picturing the stresses & strains, mechanical as well as human, of supersonic flight: with Ralph Richardson, App. Todd (Time Nov. 10)

Ann Todd (Time, Nov. 10).

The Promoter, A sprightly, Britishmade spoof, with Alec Guinness playing a

droll fellow who gets ahead in the world through sheer brass (Time, Oct, 27). Flowers of St. Francis, Several episedes from the life of Francis of Assist woven into a rich cinematic garland by

Roberto Rossellini (TIME Oct. 6). The Crimson Pirate. Buccaneer Burt Lancaster and his cutthroat crew roam the Mediterranean in a merry travesty

on pirate movies (Time, Sept. 15).
Ivanhoe, Sir Walter Scott's novel made into a rousing medieval horse opera; with Robert Taylor, Elizabeth Taylor, Joan Fontaine (Time, Aug. 4).

The Strange Ones, Striking adaptation of Jean Cocteau's Les Enfants Terribles; the story of an adolescent brother & sister living in a world of their own (Time, Tuly 21).

High Noon, A topnotch western, with Gary Cooper as an embattled cow-town marshal (TIME, July 14),

### Dollars that really pull their weight!

WHAT'S NEW about two diesels speeding down the track? They represent a revolutionary change in Erie's motive power—a change so fareaching that all Erie freight trains are now hauled entirely by diesel locomotives!

This modernization program started eight years ago, and its completion makes the Erie the first railroad operating between New York and Chicago to achieve 100% diesel power for freight service. Total cost is around 880,000,000—dollars that really pull their weight in efficiency!

Yes, the Erie has been "doing things" for a good many years. This year's milestone of 100% diesel freight service is a timely example of Erie's heavy investment in the latest and best to improve transportation.

This is just another part of Erie's progressive railroading. To the Erie shipper it pays off in improved schedules and better on-time performance. That's why so many shippers say, "Route it Erie!"

### Erie Railroad

Serving the Heart of Industrial America

### The Year in Books

For readers and critics who hoped to find the radioactive stuff of great literature, it was another disappointing year: the literary Geiger counters clicked only feebly, But publishers and booksellers, ready to settle for mere gold in the hills, found 1952 rewarding. Production costs continued to go up (as did book prices), but there were few major disappointments along publishers' row, and quite a few rich strikes. To plain readers, prospecting for good, entertaining reading, the year brought a lot of satisfaction; six novels and six nonfiction books passed the 100,000 mark, creating the kind of bookstore traffic that carried along many more modest titles. In fiction, it was a year not of newcomers but of oldtimers. The big sellers were the big names, the reassuringly familiar quantities-Hemingway, Stein-

beck, Du Maurier, Keyes, Costain, Ferber, It was the paperbacks that continued to make the biggest noise in the publishing world. Well before year's end, 270 million copies had been shipped to more than 100,000 outlets. While a depressing share of these were just penny-dreadfuls at a quarter, there was also plenty of good reading. In this volatile market, The Confessions of Saint Augustine and The Uniperse and Dr. Einstein became bestsellers -alongside Mickey Spillane (1952 sales: 6.074.135), a kind of poolroom Marquis de Sade. It was plain to the worried hardcover men that the two-bit upstarts had tapped a new market of readers. The paperbacks were even publishing originals and luring away writers with promises of better royalties and wider readership. But the paperbacks were headed for trouble: in Washington, a congressional committee was lambasting the sexy covers-frequently on reprints of eminently respectable works, e.g., a nude model on a Van Gogh biography-which had become eyesores in the nation's drugstores.

Television may have cut into the kids' reading time, but it did not stop their hopeful parents from buying books for them. Juveniles had one of their great years, accounted for at least 10% of all book titles published. Science fiction also went rocketing ahead.

In a class by itself stood the year's most important book, Winess, by Whitaker Chambers, Almost painfully honest, it was more than a brilliant report on the Hiss case, more than a personal document of a rare and troubled spirit; it was the most eloquent warning the American people had yet heard against the Communist of the property of the property

#### Fiction

The distinction of having written the year's best novel went to the old master, Ernest Hemingway. His The Old Man and the Sea was a beautifully conceived, tightly written fishing story in praise of

ERNEST HEMINGWAY The best.

man's courage and the nobility of nature. The story appeared in Lips (circ. 5,325;-447) and was a Book-of-the-Month-Club selection; that lost Hemingway a place on the top end of the bestseller list (which is compiled from bookstore sales), but it gave him the greatest immediate audience ever reached by a serobus novelist.

The true bookseller's delight was Herman Wouk's The Caine Mutiny, first published in March 1951. Never off the bestseller list, and mostly at the top, its sales in all editions reached 1.000,000.

The other leaders—Costain, Keyes, Ferber, Du Maurier—moved along pre-dictable roads, leaving their familiar foot-prints without increasing or diminishing their reputations. John Steinbeck's East of Eden was not predictable, but its loose, woolly varn on good & evil, featuring a

The most interesting new U.S. novelist as a 3-year-oid Negro. Ralpb Ellison. His Invaisible Mon was the picaresque epic of a Southern Negro trying to find a place in a white man's world. Not always in focus, its fair and vitality nevertheless made it one of the year's standouts. From nother world was Louis Kromelberger's mother world was Louis Kromelberger's better the properties of the control of the properties of the pro

The Middle Ranks, One way or another, it was a great year for Texas. After an ill-tempered clouting of its manners & morals by Edna Ferber in her bestselling Giant, the state produced three of the most widely talked-about books of the year: Madison Cooper's Sironia, Texas, a 1,731-page Texas-town saga which seemed to prove that Ferber's view had been right in the first place: Tom Lea's The Wonderful Country, singing Lea's love of his Rio Grande country, north & south of the border; and The Devil Rides Outside, by Texan John Griffin, in which a young American finds his own City of God in a French monastery.

There were a few U.S. novelists in the middle ranks who gave promise of reaching the top some day. From the South came two novels shucked clean of old magnolia and Faulkneresque gothic: Thomas Hal Phillips' neatly written, believable son & father story, Search for a Hero; and Worth Tuttle Hedden's Love Is a Wound, a thoroughly honest and quietly dramatic tale of slavish and unrequited love in North Carolina, By & large, U.S. writers seemed to serve up fewer wormwood cocktails, fewer canapes of neurosis and despair, than in previous years, A self-consciously written, cliché-laden, but interesting novel. Executive Suite. by Cameron Hawley, even dared to draw an understanding picture of a U.S. corporation and of a businessman who was not a cross between Babbitt and Captain Bligh.

The Imports. The U.S. produced the bestellers but again it was the European novelists who gave fiction its flash and host. Italy's postwar literary Vesuuius was by now coughing up old coals, but the reading temperature was still high. The moods ran from Alberto Moravia's shouldershrugging political satrie in The Fancy Dress Party to Vasco Pratolini's tenderly realistic tale of Florentine youth in The

FERBER ELLISON STEINBECK A lot of oldtimers and few newcomers.

totalitarian terror than most factual exposés. Egon Hostovsky, a former Czech diplomat, showed in Missing how his native country slipped into Moscow's grip. It read like a thriller, but had the ring of truth. More chilling than thrilling, and even truer, was Australian Godfrey Blunden's skillful vivisection of the totalitarian mind, The Time of the Assassins, a story of hapless Ukrainians who during the war tried to make a choice between Communism and Naziism but found that the same terror was at the dead center of both. Offbeat, and very good in a Tristram Shandvish way, was Epitable of a Small Winner, by Brazil's greatest writer, Machado de Assis, a ghost's witty, unsur-

prised backward look at life. From England came a new novel by Jovce Cary. Prisoner of Grace, which proved again what not enough U.S. readers seem to know: that Cary is one of the few living novelists who find life and people more interesting than his private

gripes or despairs.

Evelyn Waugh, in whose earlier books the quality of mercy had usually been missing, was in a mellower, more mature mood in Men at Arms, a fine first installment of a trilogy about men and war. Look Down in Mercy was a good first novel about combat in the Pacific by a Briton, Walter Baxter, who could tell Waugh a lot about war. Finally, there

came from England the two best historical novels of the year: Edith Simon's The Golden Hand, a leisurely, lyrical tale about a 14th century English cathedral town and the faith that sustained it: and H. F. M. Prescott's The Man on a Donkey, a long period piece about England under Henry the Eighth, which proved that literacy and historical fiction could live between the same boards.

#### Non-Fiction

The year's true bestseller was the Bible. Though this is so every year, it was true this time with an important difference. The new Revised Standard Version, product of 15 years of scholarship, was one of the few Bibles ever copyrighted. With the best book-shopping weeks still ahead, 1.600.000 copies had been sold. Next to the Bible on the bestseller list stood Catherine Marshall's warm, clear-eyed biography of her husband, the late chaplain of the Senate. A Man Called Peter. Not so searching or reflective but nearly

good enough to set beside Witness was Austrian Physicist Alexander Weissberg's The Accused, one of the best accounts yet of what happened to victims of the Kremlin purge in 1027. And those who still doubted the Communists' double-dealing in the Spanish Civil War could read George (Nineteen Eighty-Four) Orwell's Homage to Catalonia, posthumously pub-

Famous OLD FORESTER in matchless New Guest Decanter!

"There is nothing better in the market"

KENTUCKY STRAIGHT BOURBON WHISKY . BOTTLED IN BOND . 100 PROOF . BROWN-FORMAN DISTILLERS CORPORATION . AT LOUISVILLE IN KENTUCKY

When you plan printing for any purpose, remember this trade-mark. It brings you year-round greetings of happier results. It represents the diversified and standard Mead brands of printing papers for every business and advertising use.

Mead Papers include D&C coated papers and Wheelwright bristols and covers. Among these popular papers are surfaces, sizes, weights, and colors to meet every printing need.

Your printer or lithographer, and America's leading paper merchants behind him, knows Mead Papers as Santa Claus knows good little boys and good little girls. He knows that the uniformity and quality of these popular papers save time, troube, and money on every job...on big jobs, little jobs, simple jobs, elaborate jobs.

Mead Papers mean business. Specify and use them for every job, every time.

### THE MEAD CORPORATION "PAPER MAKERS TO AMERICA"

Sales Offices: The Mead Sales Co., 118 W. First St., Dayton 2 - New York - Chicago - Boston - Philadelphia - Atlanta ESTABLISHID 1846

The season's greetings will be expressed in many forms this year, and coated Mead Papers provide the printing base for such keepsukes as limited, illustrated editions of famous Christmas topics

If your shopping was simpler this year, the chances are that you were helped by the many Gift Catalogs mailed by department stores and specialty shops . . . on coated Mean lished in the U.S., one of the best books yet written about that tragic episode.

Politica & Wor. Election year brought he usual flutter of campaign quickies. John Gunther's superficial Eisenboure might well have been called Outside Ike; petent profiles at best. None of them did startlingly well. A curious, grainly illustrated hodgepodge of miscellaneous Trumaniana called Mr. Pesident—ils publication had been encouraged by Harvy as a 2000000 milk.

The best of the books about World War II was Australian Chester Wilmot's The Struggle for Europe. Its blunt criticism of U.S. foreign and military policy aroused some resentment, but there was mostly praise for its skillful, informed exposition of the fighting side of the war. Commander Edward Beach, U.S.N., wrote the most exciting of the action books in Submarine!, which showed for the first time what submerged combat was really like. The services were still pumping out solid tomes that celebrated and detailed their contributions. Among the few U.S. war leaders who had not yet published their memoirs. only Admiral Ernest J. King came forth with a full-dress account. His Fleet Admiral King reflected the toughness that made him valuable, but only a student or a devoted Navy man could follow a happy course through its battleship-grey prose.

Two important Americans made important contributions to heir fellow citizens' anto Arthur Vandeherg's Private Papers understanding of the world. The late Senator Arthur Vandeherg's Private Papers described the growth of a good mind from narrow isolations to a sharp sense of world responsibility. In Journey to the Far Patific, Covernor Tom Dewey brought back a comprehensive and surprisingly readable account of Asia's montant of Asia's montant

History & Biography. Abraham Lin-coln still was the figure of whom neither writers nor readers seem to tire. To the 5,000 books about him already written. another dozen or so were added in 'c2. Two were worth adding to any bookshelf: Stefan Lorant's Lincoln-A Picture Story of His Life, and Benjamin Thomas' lucid, informed, one-volume biography, Abraham Lincoln. For Civil War fans it was a leaner-than-usual year, but a few hooks stood out. Among them: Bell Wiley's The Life of Billy Yank, down-to-earth researches into the daily life of Union soldiers: Glory Road, the second volume of Bruce Catton's highly readable history of the Army of the Potomac: Volume III of Kenneth Williams' fine study of Union generalship, Lincoln Finds a General.

The year's diet of biography and autobiography was a varied as a good morgabord. In Arrow in the Blue, Arthur Koestler began to tell the story of his procress from Vienness bedrooms to the grimmer places of the yog's and the commissars. Dancer Agen Piper, a spiried the process of the profession of the proting of the process of the profession of the Wilson skillfully told all that anyone needs to know about the gift friend of

"Careful, Waiter, don't waste a drop-that's Old Smuggler."

## Old Smuggler

SCOTCH with a HISTORY

- Q-Why do people say "Careful, don't waste a drop?"
- A—Because the flavour of Old Spuggler is too precious to be wasted—and because it is so popular you may find your dealer temporarily out of stock.
- Q-Why is it called Old Smuggler?
- A-Because in ancient days the thrifty Scots bought their finest whisky from the "smugglers."
- Q-Why is it Scotch with a history?
- A—Because it was established in 1835 and perpetuates a colorful era in Scottish history. Ask for Old Smuggler the next time and read the complete story on the back label on every bottle.

## The man in two positions to buy!

"Have you read any good books other than the Good Book, lately?"

Charles II in Nell Guyn, Royal Mistress:
There were two important and readable books on Napoleon. One was Napoleon at St. Heleon, the journal keyst by
the grant when the teleon, the journal keyst by
the other, a first-rate full life, Napoleon
Bonaparte, by Britain's J. M. Thompson.
A book Napoleon would have enjoyed,
and one that might have helped to exvariety with the control of the control
with the control of the control
was the control of lettersto-the-family by a stout, shrewd fellow
who fought with Wellington.

Herbert Hoover produced two more volumes of his Memoirs, vigorously denounced the New Deal and disclaimed responsibility for the Great Depression. For Douglas Southall Freeman, the end pleted volume V of his massive George Washington. F.D.R., too soon, perhaps, was getting a full-scale biography in six volumes by University of Illinois Historian Frank Freided, Vol. 1, The Aptorian Frank Freided, Vol. 1, The Ap-

prenticeship, was quite pedestrian.

Among the literary biographies, Lawrence & Elisabeth Hanson's Necessary Evil: The Life of Jane Welsh Carlyle was outstanding for thoroughness, understanding and delicacy. Rupert Hart-Davies was too good a friend of his subject to write a final Hugh Walpole, but it was lively, shrewd, and at least never claimed that Walpole was a great writer. Poet Conrad Aiken's autobiography, Ushant, was a book for the few who never stumbled while reading Joyce's Ulysses. Curiously dated by its stream-of-consciousness technique, it told all about a writer who could never decide whether England or the U.S. was home. Letters of Edna St. Vincent Millay was a sketchy but frank self-portrait by the poet whose very name was poetry to young men & women of the fevered '20s. Dixon Wecter did not live to finish Sam Clemens of Hannibal, but helping hands wound up a thoroughly pleasant biography of a young scamp later known as Mark Twain.

scamp later known as Mark I Wain.
Two vastly different biographical books had solid successes, one predictable, and the author a surprise. Tailluide had all the ham to be expected from Actress Bankhead; at year's end it was at the top of the best-bank of the series of

Among many readable books of true adventure, perhaps the most exciting was Ann Davison's Last Voyage, the tense report of a tragic effort, made with her husband, to cross the Atlantic in a small boat. Aldous Huxley made an appearance with an urbane history of some 17th century French Ursuline nuns who were possessed by The Devils of Loudon. Rome and a Villa, an intellectual love affair that Author Eleanor Clark carried on with the Eternal City, made better reading than all the year's travel books put together. The finest picture book of the year was Henri Cartier-Bresson's book of magnificent photographs, The Decisive Moment.

#### Poetry & Criticism

Van Wyck Brooks brought to a close, in The Confident Vears, the most comprehensive literary history of the U.S., and Edmund Wilson, in The Shores of Light, produced the most readable book of literary criticism. A model of balanced critical estimate in small compass was English Novelisk Angus Wilson's Zola.

Digital Noverick Alagus witsoil 2000.
U.S. poets, for the most part, were still busier writing about poetry than writing poems. In Country Sleep aboved the poems. In Country Sleep aboved the some of his typically brilliant Welsh impages. But the poetic service of the year was done by English Scholar Nevill Cognition of the Canterbury Tules might yet restore the great old yanger to the common reader.

### how to make the worlds mildest drink

### MISCELLANY

Barred Comfort, In Spokane, Police Chief Clyde Phelps banned the use of tobacco and sleeping on bunks in the city jail between 6 a.m. and 6 p.m., explained: "I believe the best way to keep men from spending the winter in jail is to make it less enjoyable."

Roving Correspondent. In Milwaukee, Mrs. Irene Matkey charged her husband with desertion, claimed that he not only abandoned her with five children, but kept sending her postcards from vacation resorts saying: "Having wonderful time. Wish you were here."

Playback, In West Hartford, Conn., self-styled Electronics Student John E. Whitley received a six months' suspended jail sentence for breaking into the West Hartford Congregational Church and stealing a tape recorder, was re-arrested several months later after he broke into the West Hartford Congregational Church, stole a tape recorder.

The Touch of Reality. In Pittsburgh, James Merrian, bent on suicide, leaped from a bridge into the Ohio River, but swam quickly to shore, was hauled onto the bank by two bystanders and explained to police: "That water was too cold: I never knew it would be like that."

The Torchbearer, In Baltimore, the court found George M. Tunstall guilty of arson, but released him on probation after he testified that he had set a fire in a trash bucket at his home to smoke out his wife, who had shut herself up in a room with another man.

All Out, In Sparreholm, Sweden, Emil Elmvall, determined to chase a rat out from behind his car's upholstery, filled the car with acetylene gas, caused an explosion which blew the car top over a two-story house, shattered 300 windowpanes and injured six men.

Limited Objective. In Chicago, a teenage thief snatched Mrs. Wilma Gardner's purse containing her \$10,000 life savings, a week later mailed \$9,780 back to her with an awed note: "I never expected to find that much money. If I had, I never would have taken it.'

Name Dropper. In Bridgeton, N.J., after being naturalized, Tinco Epeus Andringa Van Hylckama Vlieg, sometime of The Netherlands, got the court's permission to change his name to Tinco Epeus Andringa Van Hylckama,

The End. In Oakland, Calif., when Edward Sandner's car broke down one time too many, he picked up a .22 rifle, pumped several shots into the tires, smashed the radiator and spark plugs with a rock, tore out the upholstery, set fire to the remains.
